4. Specific characteristics of the *repair service for the ATS-2000* that limit the availability to a particular sole source (e.g., unique features, function of the item). Describe in detail why only this suggested source can furnish the requirements to the exclusion of other sources:

The ATS-2000 radio test set requires analysis and repair of the EIM and CIM circuit card which are required in order for the test set to function properly. These two parts are specifically designed for this radio test set. DME Corporation is the sole manufacturer and distributor of these products. Therefore, the manufacturer is the only company available to replace, repair, and calibrate the ATS-2000 circuit card assemblies.

5. Check and fill in all that are applicable:

☒ The material or service must be compatible in all aspects (form, fit, and function) with existing systems presently installed. Describe the equipment you have now and how the new item/service must coordinate, connect, or interface with the existing system:

MEMORANDUM FOR RECORD
BRAND NAME / SOLE SOURCE JUSTIFICATION FOR SIMPLIFIED ACQUISITION
($3000 < PR < $100,000)

DME Corporation is the sole manufacturer and distributor of it's products and services as they are the developers of their products and their parts are designed specifically for their products for compatibility and interface purposes. Therefore, having any other company provide replacement parts or repair service would result in equipment that will not function.

☒ A patent, copyright, or proprietary data limits competition. The proprietary data are described as follows:

Per email correspondence and a signed letter from the manufacturer, DME Corporation is the sole manufacturer, design and repair authority for their systems. Email and correspondence can be found in contract M67400-12-P-0095

☒ These are "direct replacement" parts/components for existing equipment.
