Option: (Yes) 100 % 180 Days No Option

The Circuit Card Assembly is a micro-electronic device that processes inputs and outputs. This Circuit Card Assembly consists of a single printed circuit board or terminal board upon which are separately mounted manufactured electronic components such as capacitors, inductors, and resistors. This circuit card assy is used in the US Navy's Cooperative Engagement Capability, AN/USG2's Anti-Air Weapon System. This item is crucial to the operation of the system and without the system would not operate. This is the only circuit card assy that is functionally compatible with the AN/USG2's Anti-Air Weapon System and has been tested within the higher assembly.

**4. IDENTIFICATION OF STATUTORY AUTHORITY:** This J&A is based upon the authority of 10 USC 2304(c)(1), as implemented by Federal Acquisition Regulation 6.302-1. The supplies required by the agency are only available from one responsible source or a limited number of sources and no other type of supplies will satisfy agency requirements.

**5. DEMONSTRATION OF CONTRACTOR'S UNIQUE QUALIFICATIONS:**

| The current Acquisition Method Code (AMC/AMCS) is | 3R | . For the reasons explained below, these |
|---|---|---|

Supplies are only available from the following source(s): 00724 – Raytheon Company

Only the above manufacturing source will be solicited because the article to be acquired is a highly specialized part. This circuit card assembly is sourced to Raytheon Co., 00724 who owns the drawings and was identified as the approved source of supply by the ISEA during research and development. The Government does not have the rights to the drawings to be able to solicit competitively or to guarantee the same form, fit and function as the item currently being procured. No other viable sources of supply were identified during the provisioning phase for the item. There are no authorized substitutes of this item as this is the only item known to meet performance and compatibility requirements within the higher assembly. The item has to be tested within the upper assembly and qualify within approved testing specifications procedures, embedded coding procedures, design protocols, and internal QA requirements.

**6. GOVERNMENTWIDE POINT OF ENTRY NOTICE/POTENTIAL SOURCES:** The government will synopsize this contract action by posting a synopsis on FedBizOpps.gov as required by FAR Subpart 5.2. This justification and the resulting contract will be posted to FedBizOpps in accordance with FAR 5.3.

**7. DETERMINATION OF FAIR AND REASONABLE COST:** The contracting officer determines that the anticipated cost to the Government will be fair and reasonable. In instances when certified cost and pricing data are required, an analysis of cost information will be performed which will consider field pricing reports, commerciality, procurement history and other available cost and pricing information in determining price reasonableness. When certified cost and pricing data is obtained it will be used to ensure reasonableness, completeness and realism of proposed costs as required.

**8. DESCRIPTION OF MARKET SURVEY:** A technical review, which consisted of searching several Government databases included ITIMP, NSEDR, NSSP, LMS 21 and ERP, has been completed on this item.
ITIMP: Search criteria included Part Number, Design Control Activity, Cage Code, NSN, Nomenclature, AMC/AMSC, AAC, Criticality Coding, recorded approved source of supply, with all previous contracts being awarded to Raytheon when it was provisioned.
NSEDR: No drawings were available to view.
NSSP/LM21: Confirmed data collected through ITIMP.
ERP: Confirmed data collected through ITIMP and LMS 21.
Based on this market research the contracting officer has determined that the only known manufacturing source is 00724- Raytheon Co.

**9. ANY OTHER SUPPORTING FACTS:**

Based on the information available to the Government at this time, Raytheon Co. was identified as the only company approved to meet the Government's minimum needs. The data or the rights to use the data needed to purchase this part from additional sources are not owned by the Government and it is not economical to purchase them.

**10. LISTING OF INTERESTED SOURCES:** The following sources have expressed, in writing, an interest in this acquisition:
None at this time.

**11. ACTIONS TO REMOVE BARRIERS TO COMPETITION** The government will include a clause in this solicitation that provides that the government will consider alternate offers, and that alternate offerors should submit a source approval request (SAR) package that will be referred to the cognizant engineering activity. If, due to mission requirements, the current procurement cannot be delayed in order to allow sufficient time for the engineering activity to determine whether to approve the alternate offer, the SAR package will be considered for future awards.
