RMSC C. This part requires engineering source approval by the design control activity in order to maintain the quality of the part. No other commercial facility has the expertise, facilities or the test equipment necessary to repair the subject item(s) due to the proprietary data rights exercised by DRS Laurel Technologies (0ERB9). The basis for this proprietary assertion is due to the expenses accrued by DRS Laurel Technologies (0ERB9) in the development of said item(s). Market Research was conducted in accordance with FAR part 10. The results of the Market Research conducted (or the reason market research was not conducted) is as follows:

The data necessary to facilitate repair of the three items identified on exhibit "A" by sources other than DRS Laurel Technologies (0ERB9) is not currently available. The Source Development Department will send a letter to DRS Laurel Technologies (0ERB9) requesting a budgetary cost estimate and lead time for providing a complete Technical Data Package with U.S. Government rights for use of data for competitive repair purposes. A criticality determination for these items has not yet been entered into JDRS therefore a request for determination and entry into JDRS has been submitted. Source Development Department files indicate no SAR has been received from any company inter[redacted]g a source of repair for these items and that DRS Laurel Technologies (0ERB9) is the only approved source at this time. [redacted]

7. DETERMINATION OF FAIR AND REASONABLE COST: The contracting officer determines that the anticipated cost to the Government of the supplies covered by this J&A will be fair and reasonable.
