4. IDENTIFICATION OF STATUTORY AUTHORITY: This J&A is based upon the authority of 10 USC 2304(c)(1), as implemented by Federal Acquisition Regulation 6.302-1. The supplies required by the agency are only available from one responsible source or a limited number of sources and no other type of supplies will satisfy agency requirements.

5. DEMONSTRATION OF CONTRACTOR'S UNIQUE QUALIFICATIONS:

The current Acquisition Method Code (AMC/AMCS) is	3R	. For the reasons explained below, these

Supplies are only available from the following source(s): 06742 – Taylor Devices Inc

AMC 3 – Acquire for the second or subsequent time directly from the actual manufacturer.
AMSC R - – The Government does not own the data or rights to the data needed to purchase this part from another source and it has been determined not to be economically feasible to procure the data or rights to the data.

This shock mount is used on the AN/BSY-2 Submarine combat Systems Wide Aperture Array Sonar for the Seawolf Class submarine. Lockheed Martin is the design control agent for the system while Taylor Devices is the actual manufacturer of the mounts. The mounts are specially designed to hold a specific component of the system and isolate and dampen any shock or vibration of a continuous or intermittent origin. The mounts must be compatible in all aspects (form, fit & function) with the existing system presently installed. Failure of the mount to interface with the system component may result in failure of that component to operate properly. The Government does not own the necessary technical data needed to create a competitive bid package for this material.

6. GOVERNMENTWIDE POINT OF ENTRY NOTICE/POTENTIAL SOURCES: The government will synopsize this contract action by posting a synopsis on FedBizOpps.gov as required by FAR Subpart 5.2.

7. DETERMINATION OF FAIR AND REASONABLE COST: The contracting officer determines that the anticipated cost to the Government will be fair and reasonable. In instances when certified cost and pricing data are required, an analysis of cost information will be performed which will consider field pricing reports, commerciality, procurement history and other available cost and pricing information in determining price reasonableness. When certified cost and pricing data is obtained it will be used to ensure reasonableness, completeness and realism of proposed costs as required.

8. DESCRIPTION OF MARKET SURVEY: A technical review, which consisted of searching several Government databases including ITIMP, FLIS and ERP, has been completed on this item. Search criteria included Part Number, Design Control Activity, Cage Code, NSN, Nomenclature, AMC/AMSC, AAC, Criticality Coding, recorded approved sourced of supply, historical sources of supply and past contracts. Based on this market research the contracting officer has determined that the only known manufacturing source is Taylor Devices Inc., Cage 06742.

9. ANY OTHER SUPPORTING FACTS:

10. LISTING OF INTERESTED SOURCES: The following sources have expressed, in writing, an interest in this acquisition:

None

11. ACTIONS TO REMOVE BARRIERS TO COMPETITION: The solicitation will include a clause providing that the government will consider alternate offers, and that alternate offerors should submit a source approval request (SAR) package that will be referred to the cognizant engineering activity. If, due to mission requirements, the current procurement cannot be delayed in order to allow sufficient time for the engineering activity to determine whether to approve the alternate offer, the SAR package will be considered for future awards. This acquisition will be synopsized via FedBizOpps and any firm requesting a copy of the solicitation will be provided one.
