Sole Source Justification For Micro Systems Portable Flight Termination System

Micro Systems is the sole designer, developer, manufacturer and integrator of the Harpoon portable Flight Termination System (FTS). Micro Systems alone has the experience, special skills, software / algorithms, facilities and manufacturing techniques required to produce, assemble, integrate this equipment and furnish the supplies and services anticipated under this contract. The ability to meet these requirements in a timely manner depends heavily on Microsystems unique and intimate working knowledge and extensive experience with the Harpoon portable FTS, its fabrication, assembly and test procedures. The government previously attempted to develop a second source, but the only firm that expressed interest later withdrew due to the substantial initial investment cost it estimated would be required. Therefore, the Government has determined that Micro Systems is the only known firm that possesses the necessary knowledge and experience to provide and perform the required efforts under this contract.

Application:
The Flight Termination System is a redundant self-contained, portable 425 MHz transmitter which can transmit the necessary codes to monitor, arm, and destroy a missile in flight.
