The solenoid valve assembly consists of a coil, plunger, and sleeve assembly. In a normally closed valve, a plunger return spring holds the plunger against the orifice, preventing flow through the valve. When the coil is energized, a magnetic field is produced, raising the plunger and allowing flow through the valve. The hydraulic pressure regulates the 5' ammunition hoist assembly. This valve is of unique design and manufactured specifically to the 5"/54 MK 45 Gun Mount. Generalized valves are not compatible and cannot be substituted.
