4. IDENTIFICATION OF STATUTORY AUTHORITY: This J&A is based upon the authority of 10 USC 2304(c)(1), as implemented by Federal Acquisition Regulation 6.302-1. The supplies required by the agency are only available from one responsible source or a limited number of sources and no other type of supplies will satisfy agency requirements. This item was previously procured utilizing FAR 6.302-1 under SPRMM1-15-C-WB31.

5. DEMONSTRATION OF CONTRACTOR'S UNIQUE QUALIFICATIONS:

The current Acquisition Method Code (AMC/AMCS) is	5R	For the reasons explained below, these

This part requires engineering source approval by the design control activity in order to maintain the quality of the part. Existing unique design capability, engineering skills, and manufacturing knowledge by the qualified sources(s) require acquisition of the part from the approved source(s). The approved source (s) retains data rights, manufacturing knowledge, or technical data that are not economically available to the Government, and the data or knowledge is essential to maintaining the quality of the part. An alternate source must qualify in accordance with the design control activity's procedures, as approved by the cognizant Government engineering activity. The qualification procedures must be approved by the Govt. Engineering activity having jurisdiction over the part in the intended application. Only the above manufacturing source will be solicited because the article to be acquired is a highly specialized part. This Module (DVL) is coded sole source to Lockheed Martin Corporation, Cage 55316 who were identified as the approved source of supply by the ISEA during initial provisioning. The Government does not have the rights to the drawings to be able to solicit competitively or to guarantee the same form, fit and function as the item currently being procured. No other viable sources of supply were identified during the provisioning phase for the item. Based on the information available to the Government at this time, Lockheed Martin Corporation has been identified as the only contractor approved to meet the Government's minimum needs.

7. DETERMINATION OF FAIR AND REASONABLE COST: The contracting officer determines that the anticipated cost to the Government will be fair and reasonable. In instances when certified cost and pricing data are required, an analysis of cost information will be performed which will consider field pricing reports, commerciality, procurement history and other available cost and pricing information in determining price reasonableness. When certified cost and pricing data is obtained it will be used to ensure reasonableness, completeness and realism of proposed costs as required.

8. DESCRIPTION OF MARKET SURVEY: A technical review, which consisted of searching several Government databases including ITIMP, FLIS and ERP, has been completed on this item. Search criteria included Part Number, Design Control Activity, Cage Code, NSN, Nomenclature, AMC/AMSC, AAC, Criticality Coding, recorded approved sourced of supply, historical sources of supply and past contracts. Based on this market research the contracting officer has determined that the only known manufacturing source is Lockheed Martin Corporation.
Furthermore, a sources sought base notice was posted to FedBizOps on 4/4/2016 and completed on 4/11/2016 inviting potential sources to fill out a market survey and express their interest in providing an offer on this requirement to be forwarded to the design and technical activity for approval. No responses were received during the opening period of the sources sought notice. .

11. ACTIONS TO REMOVE BARRIERS TO COMPETITION: The previous J&A for SPRMM1-15-C-WB31 stated that the Government would include an Alternate Offerors Clause in the Solicitation. The Government included the Alternate Offerors Clause stated in the J&A in an attempt to remove barriers to competition. The Government will again include a clause in this solicitation that provides that the Government will consider Alternate Offers, and that Alternate Offerors should submit a source approval request (SAR) package that will be referred to the cognizant engineering activity. If, due to mission requirements, the current procurement cannot be delayed in order to allow sufficient time for the engineering activity to determine whether to approve the alternate offer, the SAR package will be considered for future awards.
