A valve controls/restricts either through manual, electronic or a sensoring device the flow of a gas, a liquid or partially liquefied solid, through an inlet and outlet configuration enabling the efficient and optimal operation of a higher assembly. This wafer style flow control Prairie Air 3.00 IPS, 300 PSI Butterfly Valve is a stainless steel, crossbolt between flanged, medium flow, single valved uniquely designed, manufactured, shock and vibration tested for the NAVYs 51 DDG class ships. The valve is designed with a temperature rating to 925 degrees Fahrenheit which is necessary since the end item is the Gas Turbine Engine Assembly, Model 501K34. The end item is configuratively controlled by DCA, CAGE 99643: Easton Corporation, Los Angeles CA. making this valve by this vendor the only suitably configured Hull, Mechanical and Electrical applicable item of supply.

4. IDENTIFICATION OF STATUTORY AUTHORITY: This J&A is based upon the authority of 10 USC 2304(c)(1), as implemented by Federal Acquisition Regulation 6.302-1. The supplies required by the agency are only available from one responsible source or a limited number of sources and no other type of supplies will satisfy agency requirements.

5. DEMONSTRATION OF CONTRACTOR'S UNIQUE QUALIFICATIONS:

The current Acquisition Method Code (AMC/AMCS) is 3R. For the reasons explained below, these Supplies are only available from the following source(s): CAGE 99643, Eaton Aerospace Corporation, Los Angeles, CA

Only the above source will be solicited because the government does not own the data or the rights to the data needed to purchase this part from an additional source for limited competitive or competitive procurement. Nor can the government economically purchase or draft adequate specifications and/or description of the material to develop a competitive solicitation, making a reverse engineering effort uneconomical as well. The government has purchased this item previously from the vendor and subsequent acquisitions will be purchased directly from the actual manufacturer, the DCA, Eaton Aerospace.

6. GOVERNMENTWIDE POINT OF ENTRY NOTICE/POTENTIAL SOURCES: The government will synopsize this contract action by posting a synopsis on FedBizOpps.gov as required by FAR Subpart 5.2.

7. DETERMINATION OF FAIR AND REASONABLE COST: The contracting officer determines that the anticipated cost to the Government will be fair and reasonable. In instances when certified cost and pricing data are required, an analysis of cost information will be performed which will consider field pricing reports, commerciality, procurement history and other available cost and pricing information in determining price reasonableness. When certified cost and pricing data is obtained it will be used to ensure reasonableness, completeness and realism of proposed costs as required.

8. DESCRIPTION OF MARKET SURVEY: The technical research and review has been completed, consisting of queries searching several Government databases including ITIMP, FLIS, NSEDR, CDMD-OA, ERP/FMT and ICAPS. Search criteria included Part Number, Design Control Activity, Cage Code, NSN, Nomenclature, AMC/AMSC, AAC, Criticality Coding, recorded approved sourced of supply, historical sources of supply and past contracts. A Sources Sought Notice was posted on FEDOPPS.COM with an opening date of 04/04/2016 and closing date of 03 May 2016, with no new manufacturer expressing an interest in providing this item. Based on this market research the contracting officer has determined that the only known manufacturing source is: CAGE 99643 – Eaton Corporation, Los Angeles, CA.

9. ANY OTHER SUPPORTING FACTS: Based on the market research, the contracting officer has determined that only the above source has the capability to provide this item of supply.

10. LISTING OF INTERESTED SOURCES: The following sources have expressed, in writing, an interest in this acquisition: *None at this time.*

11. ACTIONS TO REMOVE BARRIERS TO COMPETITION: The government will include a clause in this solicitation providing for submission of alternate source offerings. The government provides a procedure to have alternate offers and offering potential vendors the right to submit a Source Approval Request (SAR) package outlining their capability to provide a technically acceptable same or similar product. The SAR package is referred to the cognizant engineering activity at the alternate vendor's expense. If due to mission requirements, the current procurement cannot be delayed, not permitting sufficient time for the cognizant in service engineering activity alternate offer approval, the submitted SAR package will be considered for future awards. This item has been reviewed under the NAVSUP WSS limited screen process and determined that the item cannot be broken out. No additional actions to remove barriers to competition are required under this process.
