Specific characteristics of the material or service that limit the availability to a sole source/brand product (unique features, function of the item, etc.). Describe in detail why only this source/brand can furnish the requirements to the exclusion of other sources/brands. **The Metal Dynamics, Ltd. metal slat wall shelving system conforms to all salient physical, functional, and other characteristics which are specified in the General Requirements NAVSEA drawing 804-5184181 and the General Specifications for Ships of the US Navy, section 654. The Metal Dynamics, Ltd. System 90 shelving is installed in the ship's store, and using the same make/model fixtures as replacement is needed to ensure compatability with existing store fixtures. .**

The requested material or service represents the minimum requirements of the Government.

The material or service must be compatible in all aspects (form, fit and function) with existing systems presently installed/performing. Describe the equipment/function you have now and how the new item/service must coordinate, connect or interface with the existing system. **Metal Dynamics, Ltd. System 90 metal slat wall shelving fixtures are already on board ship in the ship's store. The store fixtures need to be interchangeable with existing fixtures.**

A patent, copyright or proprietary data limits competition:

The items are "direct replacement" parts/components for existing equipment. Provide the information about the Next Higher Assembly (NHA)/equipment which the replacement parts are going into (e.g. description, model, part number, Original Equipment Manufacturer (OEM), etc.).

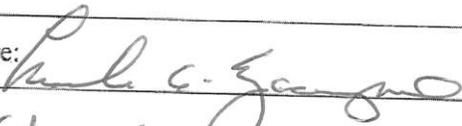

Other information to support sole source/brand name sole source procurement. The rationale must then justify "either" substantial duplication of cost to the Government that is not recovered through competition or unacceptable delays in fulfilling the mission of the agency. The use of another source for this project would have a negative impact due to the operational commitments of the ship.
