<b>0100000 – General Information</b>		
<b>Spec Item</b>	<b>Title</b>	<b>Description</b>
1.4	Background Information	The intent of this solicitation is to obtain custodial, ground maintenance and landscaping and pavement clearance service for Naval Commands Misawa and FLCY Hachinohe, Japan. The contract is a performance based specification relying on the contractor's experience and expertise. The contractor is required to determine the best method of service considering the geographical and seasonal requirements.
1.5	Verification of Workload and Conditions	Throughout the PWS, the workload data is generally referred to as being located in Section J. Section J provides data such as inventories, maps, floor plans, and tables to represent the type, quantity and location of services to be provided. However, offerors are encouraged to visit the project site during the site visit for offerors and to visit the technical library during posted hours as part of its due diligence to assess the nature of work and conditions under which work is to be performed.
1.6	Climate Patterns	Japan Meteorological Agency : <a href="http://www.jma.go.jp/">http://www.jma.go.jp/</a>
1.7	Related Information	<p>There are four types of Related Information that can be found in the Description and Related Information columns of the specification as follows:</p> <p>Informational Notes as used throughout this PWS provides additional information to offerors to be used in developing a thorough understanding of the work to be performed in this contract. Any block of text marked "Informational Notes" throughout Annexes 1 through 18 is subject to this disclaimer. Offerors may not rely upon the "Informational Notes" as material representations of the Government. Information provided in "Informational Notes" does not create a contractual requirement on either party to this contract.</p> <p>Clarifying Information describes client expectations in a more detailed manner than the Performance Objective and Performance Standard alone.</p> <p>Constraining Information describes limitations to the work performed to meet the Performance Objective and Performance Standard.</p> <p>Requirement Information further describes client requirements associated with each Performance Objective.</p>
1.8	Navy Approach to Service Contracting	The Department of Navy (DoN) spends over \$1 billion in annual obligations to meet global requirements for facility operations and maintenance provided through Facility Support Contracts (FSC) and additional billions to provide other base operations support services (OBOS). The Head of the Contracting Activity (HCA) of the Naval Facilities Engineering Command (NAVFAC) has focused increased attention on re-engineering FSC contracts in response to customer and industry feedback, budget constraints, and the impact of a variety of contracting, program management and financial management regulations. The Navy also supports the following principles:
1.8.1	Partnering Philosophy	The first principle is that the Navy views its contractors as partners and not just abstract service providers. The Navy wants its contractors to succeed because partners' success drives the Navy's successful mission completion. Within the bounds of acquisition policy the Navy intends to work to find solutions that will be beneficial to both the Government and its partners.

<b>0100000 – General Information</b>		
<b>Spec Item</b>	<b>Title</b>	<b>Description</b>
1.8.2	Contractor's Knowledge	The second principle is that the Navy will receive insightful management from its contractors. This management will include the knowledge, skills, authority and willingness to use contractor resources to find better ways of serving Navy clients' strategic and operational goals and objectives. The Navy's use of performance-based objectives evidences this principle. Although performance work statements will typically contain several levels of performance assessment, the Navy wants its contractors to exercise maximum discretion within bounds of prudent risk management to adjust processes and resources needed to reach specified objectives at the highest performance level.
1.8.3	Industry Best Practices	The third principle is that the Navy will adopt industry best commercial practices and maintain state-of-the-art service delivery. It is the Navy's and contractor's responsibility as partners to reach this goal. To that end, the Navy's emphasis will be in evaluating performance objectives (end results).
1.9	Standard Template	<p>Key to implementing a programmatic approach is using a standard template that ensures Navy-wide consistency yet affords appropriate tailoring to meet local needs. This contract conforms to the standard template and has been tailored for this solicitation. NAVFAC intends to use this template-based approach for future service contracts. Offerors should develop an understanding of the template as part of performing due diligence in reaching an understanding of the Navy's requirements and expectations.</p> <p>The standard template contains 18 standard annexes. Annex 1 will always contain information that is relevant to the entire scope of the contract. Annex 2 contains on-site project management and administration requirements that are relevant to the entire scope of the contract. Annexes 3 through 18 contain the technical information and requirements peculiar to that technical annex. Within each technical annex, the organization of information and requirements are also standardized. Specification item 1 will always contain General Information. Specification item 2 will always contain the management and administrative requirements. Specification item 3 will always contain the Firm Fixed-Price (FFP) requirements. Specification item 4 will always contain the Indefinite Delivery-Indefinite Quantity (IDIQ) requirements. Requirements and standards for higher level specification items apply to all subordinate specification items, e.g., Specification Item 3 standards apply to all firm fixed priced specification items. Specification Item 3.1 is applicable to all 3.1 subordinate specification items. Specification Items 3.2 and 3.3 are not considered subordinate to 3.1. All costs associated with Annexes 1 and 2 and Specification items 1 and 2 must be priced and distributed within Specification Item 3 of Annexes 3 through 18.</p>
1.10	Navy PBSA Approach	The Navy's approach to performance-based service acquisition (PBSA) includes four component parts which are 1) performance outcomes, 2) measurable standards, 3) consideration of incentives, and 4) performance assessment plan.
1.11	Technical Proposal Certification	The Contractor warrants that its proposal incorporated herein by reference will meet or exceed the performance objectives set forth in this contract.

DEFINITION/ACRONYM	DESCRIPTION
Air Operations (Air Ops)	The department responsible for all ground and air traffic on the airfield side of Naval Air Station.
Air Snow King	Person or persons designated by the Government to act as the overall responsible party for all airfield snow and ice operations. The Air Snow King has no authority to change, alter, or modify the contract.
Bare Pavement	Free of frozen precipitation down to the surface of the pavement. Bare pavement does not mean completely dry and may still have frozen and/or liquid precipitation in the holes, pores, divots, seams and cracks.
Clear	Free of debris, as defined below.
DOT	U.S. Department of Transportation
Debris	Includes, but is not limited to, paper, cans, bottles, limbs and branches, pine straw and pinecones, leaves, sand, soil, aggregates, grass, metals, and other similar items.
End of Cleanup	Defined as when the Contractor has met all performance objectives.
End of Precipitation	The end of the hour during which the Contractor and the KO or designated representative mutually agree the precipitation has ended
EPA	Environmental Protection Agency
FAA	Federal Aviation Administration
Finished Street, Road, or Parking Lot	<p>A paved or improved area in which the following conditions are met:</p> <p><b>Clear, Dry Area</b> – The entire area of responsibility is as close as possible to clear and dry. Not more than one inch of snow shall remain on the area, including hard packed snow.</p> <p><b>Full Width</b> – Snow is from the full width of the paved and improved area of the streets, roads, or parking lots. The snow is removed to at least the outer edge of the entire area of responsibility, so that the outer edge is exposed, unless otherwise specified.</p> <p><b>Obstructions</b> – Where obstructions such as utility poles, sign posts, fire hydrants, and trees exist between or in the midst of the streets, roads or parking area: snow shall be cleared around these objects down to the required finished depth (by hand if necessary) so that streets, roads, or parking areas are blocked with snow.</p>
Foreign Object Debris (FOD)	Any foreign object external to an aircraft that can cause damage. Examples include nuts, bolts, safety wire, baggage tags, misplaced tools, sand, rocks, asphalt chunks, birds, snakes and, rodents. Any item(s) on a runway that may be picked up by any aircraft and potentially cause damage to any part of the aircraft.
Ice (Taken from FAA AC 150/5200-30C)	The solid form of water consisting of a characteristic hexagonal symmetry of water molecules. The density of pure ice is 57 lb/ft <sup>3</sup> (913 kg/m <sup>3</sup> ), which is 9 percent less dense than water. Compacted snow becomes ice when the air passages become discontinuous at a density of about 50 lb/ft <sup>3</sup> (800 kg/m <sup>3</sup> ).
Initiation of Work	The Contractor shall initiate work as required to maintain streets, roads, and parking lots within the performance standard for snow removal and sanding.
NAS	Naval Air Station
New Storm	Any precipitation occurring after the “End of Precipitation” defined above.
Passage	The movement of persons or vehicles across paved surfaces.
Primary Runway (Taken from FAA AC 150/5200-30C)	A runway expected to be used under the existing atmospheric and storm event conditions where most of the takeoff and landing operations will take place.

J-1503060-01  
DEFINITIONS AND ACRONYMS

Secondary Runway (Taken from FAA AC 150/5200-30C)	A runway that supports a primary runway. Takeoff and landing operations on such a runway are generally less frequent than on a primary runway.
Snow (on the ground). (Taken from FAA AC 150/5200-30C)	A porous, permeable aggregate of ice grains, which can be predominately single crystals or close groupings of several crystals.
Snow Event	Any occurrence of frozen precipitation that results in visible accumulation of snow or ice on paved surfaces.
Snow King	Person or persons designated by the Government to act as the overall responsible party for all snow and ice operations. The Snow King has no authority to change, alter, or modify the contract.
Twenty-Four (24) Hour Lot	Parking Lots that have to be cleared during designated shift changes or maintained during the course of an intense storm.
