DEFINITIONS & ACRONYMS	
Term	Definition
Containerized Solid Waste	Also known as HM/HW
DD Form 1348	Standard government form used for equipment, material, or waste transfers from one party to another
Demilitarization (DEMIL)	The act of destroying the military offensive or defensive advantages inherent in certain types of equipment or material.
Dispose	To remove from Government property to an authorized facility.
Hazardous Material (HM)	Any material designated by the Department of Transportation (DOT) as posing a potential threat while being transported. Hazardous materials are listed in 49 CFR Part 172.
Hazardous Waste (HW)	Any discarded solid waste (liquid, semi-solid, solid, or gaseous) that meets the definition of a hazardous waste by United States Environmental Protection Agency (USEPA), state authorities, or the Navy. In accordance with RCRA, a solid waste is a listed hazardous waste if it is specifically listed, or it is a characteristic hazardous waste if it exhibits the characteristics of ignitability, corrosivity, reactivity, or toxicity.
Hazardous Waste Collection Event	The action that includes all of the following: The Contractor picking up waste at a client's designated location, preparing a waste turn-in form, and taking custody of the waste for proper management under this contract. Collection events also include the client delivery of waste to the Contractor's hazardous waste facility, the Contractor preparing a waste turn-in form, and taking physical custody of the waste.
Hazardous Waste Management	Systematic control of the collection, source separation, storage, transportation, processing, treatment, recovery, and disposal of hazardous waste.
Hazardous Waste Generator	Any person, by site, whose act or process produces hazardous waste whose act first causes a hazardous waste to become subject to regulation.
Hazardous Waste Management Plan	<p>In accordance with OPNAVINST 5090.1C, every Navy shore activity that generates HW shall develop and use a HW Management Plan or a HW management component in its P2 Plan and EMS. A HW Management Plan shall:</p> <ul style="list-style-type: none"> – Identify applicable federal, state, and local regulations pertaining to the generation and management of HW. – Identify training requirements and describe procedures for obtaining training and maintaining training records. – Assign responsibilities for the generation, designation, handling, storage, treatment, disposal, and all documentation. – Describe all HW generation and management procedures. – Include or reference the HW minimization plan and goals. – Include or reference contingency plans and emergency response procedures. <p>The plan shall be kept up to date to include changes in HW generation and management procedures, as well as changes in applicable federal, state, and local HW regulations. The plan shall include or reference minimization procedures sufficient to achieve DOD minimization goals. Tenant activities may be covered by the host CO's HW Management Plan.</p>
Inspect	Refers to actions the Contractor must take to insure compliance with applicable regulatory requirements of EPA, DOT, OSHA, State of California, local agencies, etc.

J-180000-06 Definitions & Acronyms

DEFINITIONS & ACRONYMS	
Term	Definition
Installation	<p>1) Initial processing and set-up of an item(s) such that it may be used for its intended purpose. Installation may also include modification to existing facilities or equipment to accommodate the item being installed.</p> <p>2) A permanent military base.</p>
Installation Environmental Program Office	The Government function on the Installation that has the authority to implement the Navy's environmental policies and decision-making regarding environmental compliance issues as well as environmental operational issues.
Less-than-90-day Accumulation Sites or Storage Facilities	Storage sites that are not RCRA permitted hazardous waste storage facilities but can serve as temporary storage sites for hazardous waste prior to the 90-day processing time limit.
Non-RCRA Hazardous Waste	Solid waste that is not EPA listed or that does not exhibit the characteristics of a hazardous waste, but that is designated as hazardous waste by the State of California.
Non-RCRA Hazardous Waste	Solid waste that is not EPA listed or that does not exhibit the characteristics of a hazardous waste, but that is designated as hazardous waste by the State of California.
Other Regulated Waste (ORW)	Wastes that are not hazardous under federal RCRA regulations, but may be regulated by other federal programs (e.g., TSCA, OSHA, CERCLA, DOT) or state agency.
Polychlorinated Biphenyls (PCBs)	A member of a class of chlorinated aromatic compounds which have been determined to be hazardous to health and the environment, and are regulated under the Toxic Substances Control Act by 40 CFR 761.
Release	Any spillage, leaking, pumping, pouring, emitting, emptying, discharging, injecting, escaping, leaching, dumping or disposing of oil or hazardous substances into the environment (air, water, or land). Includes the abandonment or discarding of barrels, containers, and other receptacles containing any hazardous substance or pollutant or contaminant.
Responsible Party	The unit, organization, or activity with primary command, control, oversight, or other direct responsibility, for the operation or equipment from which a spill or release occurs, or the area where the release occurred.
Satellite Accumulation Sites	Temporary hazardous waste accumulation sites that have a maximum capacity limit of 55 gallons per site.
Segregate	<p>1) Placing as assigned by permit or regulation in an area that prevents reactions due to incompatibilities or cross-contamination during transport or storage of hazardous materials or wastes, or</p> <p>2) To separate recyclable materials from non-recyclable materials</p>
Service Call	A request for action, usually in the form of some type of labor or effort, from the Customer to the Contractor.
Spill Prevention Control and Countermeasure (SPCC) Plan	Plan and procedures for the installation to exercise oil spill prevention measures and to provide effective countermeasures in the event of oil spill ashore.

DEFINITIONS & ACRONYMS	
Term	Definition
Transport	Refers to all actions in the movement of items such as equipment, materials, or wastes, and includes coordination, loading, segregating, storing, transporting, and off-loading. (Same as delivery)
Treatment, Storage and Disposal Facility	Facilities that are permitted by RCRA regulations to provide treatment, storage and disposal services for hazardous wastes.
Waste Analysis Plan (WAP)	A WAP serves to standardize and optimize the required testing of wastes so that all wastes at a site are properly characterized prior to disposal in a simple and efficient manner. A waste analysis plan establishes the characterization frequency and analytical requirements to be satisfied for waste at the installation and provides guidance for handling new wastes.
BUMEDINST	Bureau of Medicine and Surgery Instruction
CFR	Code of Federal Regulations
DLADS	Defense Logistics Agency Disposition Services
EPA	Environmental Protection Agency
NAVSEA	Naval Sea Systems Command
NELAP	National Environmental Laboratory Accreditation Program
NEPA	National Environmental Policy Act
NON	Notices of Noncompliance
NOV	Notices of Violation
OHS	Oil and Hazardous Substances
OPNAVINST	Chief of Naval Operations Instruction
P2ADS	Pollution Prevention Annual Disposal Summary
QA/QC	Quality Assurance and Quality Control
RCRA	Resource Conservation and Recovery Act
SPCC	Spill Prevention Control and Countermeasures
TSDF	Treatment Storage and Disposal Facilities
