Estimated Price - Costs to be considered under Group I are those applicable to preparing and assembling the data item in conformance with Government requirements, and the administrative and other expenses related to reproducing and delivering such data items to the Government.

- b. Group II. Definition - Data which is essential to the performance of the primary contracted effort, but the Contractor is required to perform additional work to conform to Government requirements with regard to depth of content, format, frequency of submittal, preparation, control, or quality of the data item.

Estimated Price - Costs to be considered under Group II are those incurred over and above the costs of the essential data item without conforming to Government requirements, and the administrative and other expenses related to reproducing and delivering such data items to the Government.

- c. Group III. Definition - Data which the Contractor must develop for his internal use in performance of the primary contracted effort and does not require any substantial change to conform to Government requirements with regard to depth of content, format, frequency of submittal, preparation, control, and quality of data.

Estimated Price - Costs to be considered under Group III are the administrative and other expenses related to reproducing and delivering such data items to the Government.

- d. Group IV. Definition - Data which is developed by the Contractor as part of his normal operating procedures and his effort in supplying these data items to the Government is minimal.

Estimated Price - Group IV items should normally be shown on the DD Form 1423 at no cost.

"BLOCK 18" - ESTIMATED TOTAL PRICE - For each item of data listed, the bidder or offeror shall enter an amount equal to that portion of the total price which is estimated to be attributable to the production or development for the Government of that item of data. These estimated data prices shall be developed only from those costs which will be incurred as a direct result of the requirement to supply the data, over and above those costs which would otherwise be incurred in performance of the contract if no data were required. The estimated data prices shall not include any amount for rights-in-data. The Government's right to use the data shall be governed by the pertinent provisions of the contract.

NOTE: Blocks 17 and 18 do not apply to advertised contracts on to negotiated contracts under \$100,000. The estimated prices filled in Block 26 will not be separately used in evaluation of offers, nor will they be reflected in distribution copies of the contract.
