5. **DEMONSTRATION OF THE URGENT NATURE OF THIS ACQUISITION:** This acquisition will be negotiated with: ( 17476 ) TELEDYNE D G O'BRIEN DIVISION  
Wavier of FAT will be granted for ( 17476 ) TELEDYNE D G O'BRIEN DIVISION  
Leadtime associated with FAT is 8 Months . Because the agency's need for the above supplies is of such unusual and compelling urgency, the above concern(s) is/are the only source(s) capable of meeting the required delivery schedule.

6. **GOVERNMENTWIDE POINT OF ENTRY NOTICE/POTENTIAL SOURCES:**  
Synopsis of the contract was waived in accordance with FAR 5.202(a)(2).

7. **DETERMINATION OF FAIR AND REASONABLE COST:** The contracting officer determines that the anticipated cost to the Government will be fair and reasonable. in instances when certified cost and pricing data are required, an analysis of cost information will be performed which will consider field pricing reports, commerciality, procurement history and other available cost and pricing information in determining price reasonableness. Certified cost and pricing data will be obtained and used to ensure reasonableness, completeness and realism of proposed costs as required.

8. **DESCRIPTION OF MARKET SURVEY:** A technical review has been made to determine and identify all known sources.

9. **ANY OTHER SUPPORTING FACTS:** Failure to obtain timely delivery of the required supplies will result in: Adverse impact to TRIDENT operation schedules.  
This procurement is in support of TRIDENT boats at TRF Kings Bay and Bangor Washington. A contract for electrical lead assemblies was awarded competitively to 11/05/2009 for delivery in September 2010. This contract has not delivered yet, and will not deliver a first article for testing for a least eight months from now due to incapability to perform. NAVSEALOGCEN, SUBMEPP and DCMA have been working with to answer technical/quality questions and to facilitate performance, the most recent assist visit occurred during 11/1/10 - 11/4/2010, but D still estimates eight months for FAT delivery.

Material needed: The Navy urgently electrical lead assemblies to satisfy backorders for the TRIDENT class submarines. The Navy drawings for these requires First Article Testing (FAT). still remains at least eight months away from being able to submit a first article, then production lead time of another six to eight months is likely. However, Teledyne Industries-DG Obrien Division successfully delivered electrical lead assemblies on four contracts during 2002-2006. These contracts waived First Article Testing; and a new non-competitive contract to Teledyne-DG Obrien Division will also waive first article testing. Awarding non-competitively to Teledyne-DG Obrien will cut up to 8 months of lead time off the current scenario with . Teledyne-DG Obrien (17476) is the only known source that has successfully produced this item recently and has a qualified FAT.

Reason for urgency: There are 12 CASREP requisitions for TRIDENT boats associated with this item (12 of the backorders). Current and future demand suggests accumulation of at least more high priority requisitions within a year. the TRIDENT community urgently requires this material to avoid affecting critical national mission accomplishment.

- (a) Backorders On Hand 0 On Contract
- (b) Anticipated additional backorders during PLT Quarterly Demand
- (c) Other facts as applicabile: (none)

**11. ACTIONS TO REMOVE BARRIERS TO COMPETITION:**

This NSN is normally competitive with FAT requirements. However, because of the urgency, it is being limited to Teledyne-DG Obrien Division who is currently the only approved FAT Source.

**12. STATEMENT OF DELIVERY REQUIREMENTS:**

(a) The required delivery date (month/year) is: 02/2011

(b) Ship To: [REDACTED]

**13. REFERENCE TO THE APPROVED ACQUISITION PLAN:** An Acquisition Plan is not required for this acquisition.

**14. DOCUMENTATION FOR SPARE/REPAIR PARTS ACQUISITIONS:** The specifications for the above articles have been reviewed and reflect the minimum needs of the Government.
