10 USC 2304(c)(1), as implemented by Federal Acquisition Regulation 6.302-1.

5. DEMONSTRATION OF CONTRACTOR'S UNIQUE QUALIFICATIONS:

The current Acquisition Method Suffix Code is: 1C

This acquisition will be negotiated with: UPCO (17610), McCormick (06331)

Only the above will be solicited because the articles to be acquired are highly specialized parts, designed and manufactured by a non-Government activity and the technical data required for the above acquisition by other than the above is not available. This part requires engineering source approval by the design control activity in order to maintain the quality of the part.

The proposed solicitation will be synopsisized in the FEDBIZOPPS, which is the Government wide Point of Entry (GPE).

7. DETERMINATION OF FAIR AND REASONABLE COST: The contracting officer determines that the anticipated cost to the Government will be fair and reasonable. In instances when certified cost and pricing data are required, an analysis of cost information will be performed which will consider field pricing reports, commerciality, procurement history and other available cost and pricing information in determining price reasonableness. Certified cost and pricing data will be obtained and used to ensure reasonableness, completeness and realism of proposed costs as required.

8. DESCRIPTION OF MARKET SURVEY: A technical review was completed to determine and identify all known sources. The results of this review, completed on 30 April 2014, have determined that no new sources have expressed an interest in manufacturing this item.

9. ANY OTHER SUPPORTING FACTS: The articles to be procured are complex and must meet operational and reliability requirements, the achievement of which requires unique production techniques and extensive and/or sophisticated testing. Existing unique design capability, engineering skills, and manufacturing knowledge by qualified source(s) require acquisition of part from approved sources(s). The approved source(s) retain data rights, manufacturing knowledge, or technical data that are not economically available to the Government, and the data or knowledge is essential to maintaining the quality of the part. An alternate source must qualify in accordance with the design control activity's procedures, as approved by the cognizant Government engineering activity. Therefore, acquisition is restricted to: (UPCO, 17610; McCormick 06331)
