Description of the item or service required, the estimated cost, and required delivery date.

Tool kits required for shaft alley 5 and 6 for the emergency stern tube tool box as per s9243-a4-mma-010 and, packing for the stern tube. Without these materials the main spaces are deemed inoperable, and unsafe. Wartsila is the particular manufacturer for the stern tube and the emergency packing materials which are ship specific. Estimated cost for both tool kits and packing is \$23,605.52. Delivery is estimated 7-9 weeks from purchase. Ships force requests delivery as soon as materials become available.

Specific characteristics of the material or service that limit the availability to a sole source (unique features, function of the item, etc.). Describe in detail why only this suggested source can furnish the requirements to the exclusion of other sources.

The stern tube on the USS Bataan is manufactured and contracted out by Wartsila. Previously there was an existing NIIN for the tool kit and packing which is now currently canceled, with no other replacements. Through the search there are no supplemental NIINs for the required materials. As previously stated Wartsila is the only company that provides the equipment needed as per technical manual s9243-a4-mma-010.

The requested material or service represents the minimum requirements of the government.
