Specific characteristics of the material or service that limit the availability to a sole source/brand product (unique features, function of the item, etc.). Describe in detail why only this source/brand can furnish the requirements to the exclusion of other sources/brands. **NRSW Harbor Security Boats (HSB) conducting 24/7 operations require replacement Wing sheaths. Sheaths encapsulate the tube and foam portions of the boats Wing Inflatable fender system protecting the hull from being damaged. However, over time the sheaths are heavily used, get torn and damaged. Current systems have been on boats in use from 2-6 years and require replacement. Wing Inflatable is the OEM and the only manufacture for these sheaths and systems specifically designed for the various models of HSB used within NRSW.**

The requested material or service represents the minimum requirements of the Government. **This acquisition represents the minimum of the government and is the minimum amount of equipment necessary to meet NRSW Port Operations and NRSW Harbor Security mission requirements.**

The material or service must be compatible in all aspects (form, fit and function) with existing systems presently installed/performing. Describe the equipment/function you have now and how the new item/service must coordinate,

A patent, copyright or proprietary data limits competition:

The items are "direct replacement" parts/components for existing equipment. Provide the information about the Next Higher Assembly (NHA)/equipment which the replacement parts are going into (e.g. description, model, part number, Original Equipment Manufacturer (OEM), etc.).

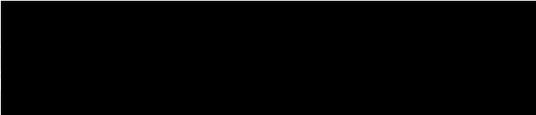

Other information to support sole source/brand name sole source procurement. The rationale must then justify "either" substantial duplication of cost to the Government that is not recovered through competition or unacceptable delays in fulfilling the mission of the agency.
