Specific characteristics of the material or service that limit the availability to a sole source or particular brand name (unique features, function of the item, etc.). Describe in detail why only this suggested source can furnish the requirements to the exclusion of other sources.

The requested materials have been installed in large quantities across Navy Bases in the Pacific. Due to a history of interoperability, durability and ease to install and maintain these items are required to minimize the requirement to retool and/or re-train the organic workforce and minimize the total number of maintenance spares maintained on hand.

The requested material or service represents the minimum requirements of the government
