Naics 238290 – Other Building Equipment Contractors

Subject: Notice of Intent to award a Sole-Source Utility Energy Services Contract (UESC) for Energy Conservation Measures in Navy Region Northwest

In accordance with 10 USC 2319(d), Naval Facilities Engineering Command Northwest intends to award, on a sole-source basis, a delivery order for several energy conservation projects on its Utility Energy Services Contract (UESC) Basic Ordering Agreement with the Bonneville Power Administration (BPA). The legislation cited above authorizes military departments to accept financing terms from their utility provider in order to implement energy conservation measures. These projects will be financed in accordance with this legislation and no other type of entity is able to offer financing and the military is unable to accept financing from any other type of entity. A Justification & Authorization (J&A) will be published when the delivery order is awarded citing FAR 6.302-5 “Authorized or Required by Statute” as the justification for a sole – source procurement.

The projects to be financed on this delivery order are: Welding Equipment Improvements at Naval Base Kitsap (NBK) Bremerton; Repair Compressed Air Leaks at NBK Bremerton; LED Street and Parking Lot Lighting, interior lighting upgrades and water fixture upgrades at Naval Station Everett; Interior lighting upgrades, HVAC Improvements, Retro-commissioning, and Energy Management Controls at Naval Air Station Whidbey Island; Photocell Retrofits at NBK Bremerton; Replace Street lights with Low Voltage LED lighting at NBK Bremerton. The total amount to be financed for these projects will be between \$5,000,000 and \$10,000,000. These projects will be awarded on or around 14 January 2011.
