

Question	Response
<p>Regarding Criterion 2. Key Personnel's Professional Qualifications, and Specialized Experience and Technical Competence. Key personnel disciplines include "Project Manager or Project Architect." Under Submission Requirements, the solicitation states that "Specialized experience and technical competence shall be limited to the two (2) Project Architects." Is it required that the Project Manager be an architect? If not, should we provide resume information for a Project Manager (Blocks 12 through 18 only) and a Project Architect (Blocks 12 through 19)?</p>	<p>Project Manager shall be an architect.</p>
