

**“Sole Source Documentation – SAP” or “Limited Source Justification – FSS”**

**1. THE INTENDED USE OF THE MATERIAL OR SERVICE:**

Award of a contract to Hosei Co., LTD, on a sole source basis, to accomplish weight test of lifting slings, aboard USS Harpers Ferry(LSD-49), located at U.S. Navy Ship Repair Facility & Japan Regional Maintenance Center Detachment, Sasebo, Japan.

**2. THE CRITICAL OR UNIQUE CHARACTERISTICS OF THE MATERIAL OR SERVICE WHICH ARE MANDATORY FOR THE INTENDED USE:**

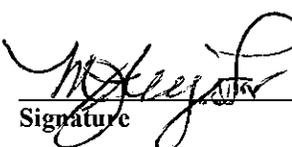

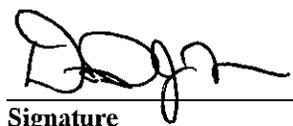

Hosei Co., LTD has already been awarded a contract to accomplish weight test of other lifting slings, and have the required equipment/weights in place, and the technical knowledge, to accomplish this job, in the short timeframe. These (2) jobs will need to interface with each other and it will be very difficult, if not impossible, to coordinate them, if (2) different contractors are involved. These are critical work items, and have the potential to delay ship's deployment, if not properly executed.

**3. REASONS WHY ONLY THE SELECTED SOURCE CAN FURNISH THE REQUIREMENTS TO THE EXCLUSION OF ALL OTHER SOURCES. PLEASE INCLUDE PROPRIETARY STATEMENT FROM VENDOR OR PATENT NUMBER IF APPLICABLE:**

Since both of these work items need to be worked by the same contractor, not sole sourcing this job to Hosei Co., LTD would require cancellation of the entire sling testing contract. This job is a CWP, and would require many man-hours of planning to re-write. Sole-Sourcing this job to Hosei Co., LTD is in the best interest of the government.

**4. ADDITIONAL JUSTIFICATION/COMMENTS:**

This repair is required before the ship's deployment in early March 2011, and the ship will be unable to accomplish their mission without this job being accomplished.
