**4. IDENTIFICATION OF STATUTORY AUTHORITY:** This J&A is based upon the authority of 10 USC 2304(c)(1), as implemented by Federal Acquisition Regulation 6.302-1.

**5. DEMONSTRATION OF CONTRACTOR'S UNIQUE QUALIFICATIONS:**

The current Acquisition Method Code (AMC/AMCS) is 3Z. This acquisition will be negotiated with:  
(CAGE 0X9M7) THE TITUS COMPANY

Only this source will be solicited because the articles to be acquired are highly specialized parts, designed and manufactured by a non-Government activity. This is a first time procurement for this part. This item is a repairable item that is a direct replacement for a consumable item currently in use. The part is used as a filter in the MARC 350A Low Pressure Air Plant which is manufactured by RIX Industries. The membrane itself is a commercial item however the housing that contains the membrane requires special heavyweight shock testing approval. The Titus Company is the only source that has been approved to provide the shock qualified housing. As this is a spare part procurement for a system that is already installed, no other manufacturer's part can be used as a replacement for this item.

**6. GOVERNMENTWIDE POINT OF ENTRY NOTICE/POTENTIAL SOURCES:** A synopsis of this proposed sole source action along with this justification, the solicitation & the resulting contract will be posted on FedBizOpps.

**7. DETERMINATION OF FAIR AND REASONABLE COST:** The contracting officer determines that the anticipated cost to the Government will be fair and reasonable. In instances when certified cost and pricing data are required, an analysis of cost information will be performed which will consider field pricing reports, commerciality, procurement history and other available cost and pricing information in determining price reasonableness. When certified cost and pricing data is obtained it will be used to ensure reasonableness, completeness and realism of proposed costs as required.

**8. DESCRIPTION OF MARKET SURVEY:** A technical review has been conducted, and based on this review, the contracting officer determines there are no other identifiable sources. Prior market research has determined this item to be of a commercial nature which is designated with the AMC/AMSC Code of 3Z. The internal membrane dryer is a commercial item which is a proprietary design manufactured by Air Products and Chemicals, Inc. The membrane is contained in a special shock test approved housing manufactured by The Titus Company who is the only approved source to provide the housing. Based on this information the contracting officer has determined that the only known manufacturing source is THE TITUS COMPANY.

**9. ANY OTHER SUPPORTING FACTS:**

Drawings are not available for full and open competition.

**10. LISTING OF INTERESTED SOURCES:** The following sources have expressed, in writing, an interest in this acquisition:

NONE

**11. ACTIONS TO REMOVE BARRIERS TO COMPETITION:** The government will include a clause in this solicitation that provides that the government will consider alternate offers, and that alternate offerors should submit a source approval request (SAR) package that will be referred to the cognizant engineering activity. If, due to mission requirements, the current procurement cannot be delayed in order to allow sufficient time for the engineering activity to determine whether to approve the alternate offer, the SAR package will be considered for future awards. This item has been reviewed under the NAVSUP WSS limited screen process and determined that the item cannot be broken out. No additional actions to remove barriers to competition are required under this process.
