| Supplies are only available from the following source(s): (CAGE) 2M191 RAYTHEON CO. |    |  |

This part requires engineering source approval by the design control activity in order to maintain the quality of the part. Existing unique design capability, engineering skills, and manufacturing knowledge by the qualified source(s) require acquisition of the part from the approved source(s). The approved source (s) retains data rights, manufacturing knowledge, or technical data that are not economically available to the Government, and the data or knowledge is essential to maintaining the quality of the part. An alternate source must qualify in accordance with the design control activity's procedures, as approved by the cognizant Government engineering activity. The qualification procedures must be approved by the Govt. Engineering activity having jurisdiction over the part in the intended application. Only the above manufacturing source(s) will be solicited because the article to be acquired is a highly specialized part. This Circuit Card (Power Supply Module) is coded sole source to Raytheon Co. Cage 2M191 and were identified as the approved source of supply by the ISEA during initial provisioning. No other viable sources of supply were identified during the provisioning phase for the item. Based on the information available to the Government at this time Circuit Card (Power Supply Module) Raytheon Co.
