**4. IDENTIFICATION OF STATUTORY AUTHORITY:** This J&A is based upon the authority of 10 USC 2304(c)(1), as implemented by Federal Acquisition Regulation 6.302-1.

**5. DEMONSTRATION OF CONTRACTOR'S UNIQUE QUALIFICATIONS:**

The current Acquisition Method Code (AMC/AMCS) is: 3C. This acquisition will be negotiated with:

**6. GOVERNMENTWIDE POINT OF ENTRY NOTICE/POTENTIAL SOURCES:** This justification, the solicitation & the resulting contract will be posted on FedBizOpps.

**7. DETERMINATION OF FAIR AND REASONABLE COST:** The contracting officer determines that the anticipated cost to the Government will be fair and reasonable. In instances when certified cost and pricing data are required, an analysis of cost information will be performed which will consider field pricing reports, commerciality, procurement history and other available cost and pricing information in determining price reasonableness. When certified cost and pricing data is obtained it will be used to ensure reasonableness, completeness and realism of proposed costs as required.

**8. DESCRIPTION OF MARKET SURVEY:** A technical review of weapons system support files to include drawing review, configuration certification and assessment of engineering criticality has been made to determine acquisition method, valid item procurement references and to identify all known sources. A market survey was performed using various internet product research resources. No valid alternate parts were identified. An additional market survey will be conducted by synopsising the planned contract action through the Government wide Point of Entry; any source which demonstrates its capability to supply the required items will be given an opportunity to compete. There is no known acceptable commercial equivalent available for these items.

**9. ANY OTHER SUPPORTING FACTS:**

This part requires engineering source approval by the design control activity in order to maintain the quality of the part. An alternate source must qualify in accordance with the design control activity's procedures, as approved by the cognizant government engineering activity.
