Item description required for all items:

This flexible, tactical workstation is configured using high-performance COTS modules housed in militarized enclosures. The Q-70 can be installed in airborne, surface, and submarine platforms to fulfill multiple combat system tasks. With the capability to emulate legacy display systems, the Q-70 workstation allows for immediate transition to open combat architectures and provides a cost-effective protection of prior hardware and software investments.

Nomen	Converter, VGA-DVI	Quantity	1
NSN	1HM 5963-01-599-1484	Cage Code	52088
P/N	B1500	Unit Price	
Estimated Value (include option)		PD#: N0010414X3699	

Appropriation, Subhead and Cost Code:

97 00 XX XX 4930 NC1A 000 81004 0 050120 7R 000000 8PMF00000000

Option: Yes	%	Days	No Option X
-------------	---	------	-------------

This flexible, tactical workstation is configured using high-performance COTS modules housed in militarized enclosures. The Q-70 can be installed in airborne, surface, and submarine platforms to fulfill multiple combat system tasks. With the capability to emulate legacy display systems, the Q-70 workstation allows for immediate transition to open combat architectures and provides a cost-effective protection of prior hardware and software investments.

spares C1 J&A
Revised 5/11

REQUISITION NUMBER/PD: Various – see attached

FOLDER NUMBER: 14038-0071

4. IDENTIFICATION OF STATUTORY AUTHORITY: This J&A is based upon the authority of 10 USC 2304(c)(1), as implemented by Federal Acquisition Regulation 6.302-1. The supplies required by the agency are only available from one responsible source or a limited number of sources and no other type of supplies will satisfy agency requirements.

5. DEMONSTRATION OF CONTRACTOR'S UNIQUE QUALIFICATIONS:

The current Acquisition Method Code (AMC/AMCS) is 3R . For the reasons explained below, these Supplies are only available from the following source(s): (52088) Lockheed Martin Corporation

Only the above manufacturing source(s) will be solicited because the article to be acquired is a highly specialized part. This material is coded sole source to Lockheed Martin Corporation, CAGE: 52088 who owns the drawings and were identified as the approved source of supply by the ISEA during initial provisioning. The Government does not have the rights to the drawings to be able to solicit competitively or to guarantee the same form, fit and function as the item currently being procured. No other viable sources of supply were identified during the provisioning phase for the item. Based on the information available to the Government at this time, Lockheed Martin Corporation has been identified as the only unit approved to meet the Government's minimum needs. Only this source will be solicited because the articles to be acquired are highly specialized parts, designed and manufactured by this non-Government activity. No other manufacturer's part can be used as a replacement for this item. The data or the rights to use the data needed to purchase this part from additional sources are not owned by the Government and it is not economical to purchase them. Lockheed Martin (LM) is the Original Equipment Supplier, design agent, and system integrator for the Q-70 weapon system. LM has the expert knowledge of the design and operational characteristics of this weapon system, to include various configurations on multiple platforms, which includes Maritime, Air and Land-based applications. LM has an established supplier base consisting of more than 70 COTS/NDI product lines. LM has unique and expansive knowledge of the design and engineering processes associated with support of the numerous Q-70 configurations. This expertise and engineering knowledge cannot be readily duplicated without significant time and cost associated with re-engineering, which would result in programmatic risk to Navy Combat Systems equipment and schedules. LM, by virtue of their unique knowledge and expertise as the Original Equipment Supplier, design agent and system integrator for the Q-70 Weapons System is currently the only source capable of performing the functions of production. Only LM has the engineering knowledge, engineering technical data, production expertise, configuration control data knowledge and configuration design familiarity required to carry out this procurement. The articles furnished under the order are complex and must meet operational, configuration and reliability requirements. The Government does not possess the technical data and expertise necessary to accomplish these procurement through other means or sources. This order is being negotiated with Lockheed Martin MS2, Manassas, VA, because they possess the technical data, knowledge and expertise on critical processes, procedures, software, firmware, components and test fixtures. LM has technical detailed knowledge of operating systems, diagnostic software, and the interface requirements; both past and present. This knowledge and ability to determine legacy system interdependencies with future support requirements would require significant cost and time to replicate without significant risk to Navy Combat System Programs. The recent detailed technical review of all Q-70 NSNs performed by the applicable In-Service Engineering Agencies and Technical authorities indicates that the Government does not possess the engineering knowledge or technical data required for full and open competition. At this time, only Lockheed Martin has the technical knowledge, data, background, production expertise and design familiarity to perform the coordination of Q70 parts production.

6. GOVERNMENTWIDE POINT OF ENTRY NOTICE/POTENTIAL SOURCES: A presolicitation notice to inform potential sources of this impending requirement will be sent to the GPE in accordance with FAR 5.201. This justification and the resultant award will be synopsisized via posting to FedBizOpps.

7. DETERMINATION OF FAIR AND REASONABLE COST: The contracting officer determines that the anticipated cost to the Government will be fair and reasonable. In instances when certified cost and pricing data are required, an analysis of cost information will be performed which will consider field pricing reports, commerciality, procurement history and other available cost and pricing information in determining price reasonableness. When certified cost and pricing data is obtained it will be used to ensure reasonableness, completeness and realism of proposed costs as required.

8. DESCRIPTION OF MARKET SURVEY: A technical review, which consisted of searching several Government databases including ITIMP, FLIS and ERP, has been completed on this item. Search criteria included Part Number, Design Control Activity, Cage Code, NSN, Nomenclature, AMC/AMSC, AAC, Criticality Coding, recorded approved sourced of supply, historical sources of supply and past contracts. Based on this market research the contracting officer has determined that the only known manufacturing source is 52088. ERP Master Data Base, WEBFLIS and HAYSTACK data bases were queried through item interrogation to ascertain potential alternate sources that may be identified that would meet the Government's minimum requirements for the tasks. At this time no additional sources were identified through these research efforts.

9. ANY OTHER SUPPORTING FACTS:

Drawings are not available for full and open competition.

The data or the rights to use the data needed to purchase this part from additional sources are not owned by the Government and it is not economical to purchase them.

10. LISTING OF INTERESTED SOURCES: The following sources have expressed, in writing, an interest in this acquisition:

None at this time.

11. ACTIONS TO REMOVE BARRIERS TO COMPETITION: The government will include a clause in this solicitation that provides that the government will consider alternate offers, and that alternate offerors should submit a source approval request (SAR) package that will be referred to the cognizant engineering activity. If, due to mission requirements, the current procurement cannot be delayed in order to allow sufficient time for the engineering activity to determine whether to approve the alternate offer, the SAR package will be considered for future awards. This item has been reviewed under the NAVSUP WSS limited screen process and determined that the item cannot be broken out. No additional actions to remove barriers to competition are required under this process. For reasons set forth in Paragraph (5) and (9), NAVSUP WSS has no plans at this time to compete future contracts for the types of supplies/services covered by this document. If another potential source emerges, NAVSUP WSS will assess whether competition for future requirements is feasible.

REQUISITION NUMBER/PD: Various – see attached

FOLDER NUMBER: 14038-0071

12. STATEMENT OF DELIVERY REQUIREMENTS:

(a) The required delivery date (month/year) is: 03/15

(b) Ship To: Q93111 – Lockheed Martin, Virginia Beach, VA

13. REFERENCE TO THE APPROVED ACQUISITION PLAN: An Acquisition Plan is not required for this acquisition.

14. DOCUMENTATION FOR SPARE/REPAIR PARTS ACQUISITIONS: The specifications for the above articles have been reviewed and reflect the minimum needs of the Government.
