The current Acquisition Method Code (AMC/AMCS) is | 3R | . For the reasons explained below, these Supplies are only available from the following source(s): 78062 (DOVER ENGINEERED SYSTEMS INC)

AMC 3. Acquire, for the second or subsequent time, directly from the actual manufacturer.
AMSC R. The Government does not own the data or the rights to the data needed to purchase this part from additional sources. It has been determined to be uneconomical to buy the data or rights to the data. It is uneconomical to reverse engineer the part. This code is used when the Government did not initially purchase the data and/or rights. If only one source has the rights or data to manufacture this item, AMCs 3, 4, or 5 are valid. If two or more sources have the rights or data to manufacture this item, AMCs 1 or 2 are valid.

Dover Engineered Systems Inc, doing business as Sargent Controls and Aerospace,own the rights to the design of this part. Specializing in tight tolerance matched set componentry and the proprietary quiet control technology, Sargent is able to provide solutions for the most difficult aerospace and military applications. A less restrictive specification does not currently exist and development of such an item at this time would not meet the immediate needs of the fleet. The source approval activity is the following: Ship Systems Engineering Station, Carderock Division, Naval Surface Warfare Center.

6. GOVERNMENT WIDE POINT OF ENTRY NOTICE/POTENTIAL SOURCES: The government will synopsize this contract action by posting a synopsis on FedBizOpps.gov as required by FAR Subpart 5.2.

7. DETERMINATION OF FAIR AND REASONABLE COST: The contracting officer determines that the anticipated cost to the Government will be fair and reasonable. In instances when certified cost and pricing data are required, an analysis of cost information will be performed which will consider field pricing reports, commerciality, procurement history and other available cost and pricing information in determining price reasonableness. When certified cost and pricing data is obtained it will be used to ensure reasonableness, completeness and realism of proposed costs as required.

8. DESCRIPTION OF MARKET SURVEY: A technical review, which consisted of searching several Government databases including ITIMP, FLIS and ERP, has been completed on this item. Search criteria included Part Number, Design Control Activity, Cage Code, NSN, Nomenclature, AMC/AMSC, AAC, Criticality Coding, recorded approved sourced of supply, historical sources of supply and past contracts. Based on this market research the contracting officer has determined that the only known manufacturing source is 78062 (DOVER ENGINEERED SYSTEMS INC)

9. ANY OTHER SUPPORTING FACTS:

The Government does not own the data or the rights to the data needed to purchase this part from additional sources. It has been determined to be uneconomical to buy the data or rights to the data. It is uneconomical to reverse engineer the part.

Dover Engineered Systems/Sargent Controls and Aerospace has successfully supported previous requirements for similar hydraulic control valves. No award history exists with this item.

10. LISTING OF INTERESTED SOURCES: The following sources have expressed, in writing, an interest in this acquisition: None at this time.

11. ACTIONS TO REMOVE BARRIERS TO COMPETITION: The government will include a clause in this solicitation that provides that the government will consider alternate offers, and that alternate offerors should submit a source approval request (SAR) package that will be referred to the cognizant engineering activity. If, due to mission requirements, the current procurement cannot be delayed in order to allow sufficient time for the engineering activity to determine whether to approve the alternate offer, the SAR package will be considered for future awards. This item has been reviewed under the NAVSUP WSS limited screen process and determined that the item cannot be broken out. No additional actions to remove barriers to competition are required under this process.
