2. NATURE/DESCRIPTION OF ACTION: This J&A is for the negotiation and award of a contract through other than full and open competition.

3. DESCRIPTION OF SUPPLIES/SERVICES: This J&A cover the acquisition of the following article(s):

Nomen PLT, NOZ 20DEG OVS Quantity 1

Option: Yes _____ % _____ Days _____ No Option X
Item description required for all items:
This steam turbine nozzle is part of the Steam and Electric Propulsion systems on Aircraft Carriers.

4. IDENTIFICATION OF STATUTORY AUTHORITY: This J&A is based upon the authority of 10 USC 2304(c)(1), as implemented by Federal Acquisition Regulation 6.302-1. The supplies required by the agency are only available from one responsible source or a limited number of sources and no other type of supplies will satisfy agency requirements.

5. DEMONSTRATION OF CONTRACTOR'S UNIQUE QUALIFICATIONS:

The current Acquisition Method Code (AMC/AMSC) is 3P. For the reasons explained below, these supplies are only available from the following source: Dresser-Rand Company (0BR59)

AMC 3 – Acquire for the second or subsequent time directly from the actual manufacturer.
AMSC P – The rights to use data needed to purchase this part from additional source(s) is not owned by the Government and cannot be purchased, developed or otherwise obtained.

Only the above source will be solicited because the articles to be acquired are highly specialized spare parts designed and manufactured by a non-Government entity. The steam turbine nozzles being procured are high pressure steam nozzles and are part of the Main Propulsion Steam Turbine manufactured by Dresser Rand and installed in the CVN Class Ships. Their function is to redirect steam in the steam path to rotate the turbine rotor which in turn provides drive power to the ship propellers. The nozzles must be compatible in all aspects with the existing system presently installed. Failure of the nozzles to properly interface and function with the Dresser Rand steam turbines already installed would result in inoperable turbines and subsequently prohibit movement of the ship. The steam turbines and their parts are proprietary to Dresser Rand. The technical data required for the above acquisition is not available to the Government and therefore a competitive technical data package cannot be compiled.

6. GOVERNMENTWIDE POINT OF ENTRY NOTICE/POTENTIAL SOURCES: The Government will synopsize this contract action by posting a synopsis on FedBizOpps.gov as required by FAR Subpart 5.2

7. DETERMINATION OF FAIR AND REASONABLE COST: The contracting officer determines that the anticipated cost to the Government will be fair and reasonable. In instances when certified cost and pricing data are required, an analysis of cost information will be performed which will consider field pricing reports, commerciality, procurement history and other available cost and pricing information in determining price reasonableness. When certified cost and pricing data is obtained, it will be used to ensure reasonableness, completeness and realism of proposed costs as required.

8. DESCRIPTION OF MARKET SURVEY: A technical review, which consisted of searching several Government databases including ITIMP, FLIS and ERP has been completed on this item. Search criteria included Part number, Design Control Activity, Cage Code, NSN, Nomenclature, AMC/AMSC, AAC, Criticality Coding, recorded approved sources of supply, historical sources of supply and past contracts. Based on this market research, the Contracting officer has determined that the only known manufacturing source is Dresser Rand Company.

9. ANY OTHER SUPPORTING FACTS: None

10. LISTING OF INTERESTED SOURCES: The following sources have expressed, in writing, an interest in this acquisition:
None.

11. ACTIONS TO REMOVE BARRIERS TO COMPETITION:
The solicitation will include a clause providing that the Government will consider alternate offers, and that alternate offerors should submit a source approval request (SAR) package that will be referred to the cognizant engineering activity. If, due to mission requirements, the current procurement cannot be delayed in order to allow sufficient time for the engineering activity to determine whether to approve an alternate offer, the SAR package will be considered for future awards. If other potential sources emerge, NAVSUP WSS will reassess the whether competition for future requirements is feasible.
