3.) Acquire, for the second or subsequent time, directly from the actual manufacturer.

C.) This part requires engineering source approval by the design control activity in order to maintain the quality of the part. Existing unique design capability, engineering skills, and manufacturing knowledge by the qualified source(s) require acquisition of the part from the approved source(s). The approved source(s) retain data rights, manufacturing knowledge, or technical data that are not economically available to the Government, and the data or knowledge is essential to maintaining the quality of the part.

Only the above will be solicited because the articles to be acquired are highly specialized parts, designed and manufactured by a non-Government activity and the technical data required for acquisition by other than the above is not available.

6. **FEDERAL BUSINESS OPPORTUNITIES/POTENTIAL SOURCES:** The proposed contract was/will be synopsisized in the FedBizOpps website for government wide point of entry.

7. **DETERMINATION OF FAIR AND REASONABLE COST:** The contracting officer determines that the anticipated cost to the government will be fair and reasonable. In instances when certified cost and pricing are required, an analysis of cost information will be performed which will consider field pricing reports, commerciality, procurement history, and other available cost and pricing information in determining reasonableness. Certified cost and pricing data will be obtained and used to ensure reasonableness, completeness, and realism of proposed costs as required.

8. **DESCRIPTION OF MARKET SURVEY:**

A technical review has been made to determine and identify all known sources.

9. **ANY OTHER SUPPORTING FACTS:**

The articles to be procured are complex and must meet critical operational and reliability requirements, the achievement of which requires unique production techniques and extensive and/or sophisticated testing, and the government has not yet acquired or developed the technical data.

Only Bell (97499) will be solicited due to the items being Critical Application Items (CAI) and only NAVAIR can approve CAI sources. The approval process involves inspection and review of manufacturing techniques, special skills, qualifications, and knowledge required to complete the complex procedures. The cognizant Government engineering activity is responsible for this process. NAVAIR has only currently approved this source for these items.

10. **LISTING OF INTERESTED SOURCES:** The following sources have expressed, in writing, an interest in this acquisition.

11. ACTIONS TO REMOVE BARRIERS TO COMPETITION:

NAVSUP Weapon Systems Support (NAVSUP WSS) has a breakout program designed to convert as many acquisitions to full and open competition as possible. The program is designed to acquire the necessary technical data needed to procure the requirements of NAVSUP WSS by full and open competition.

12. STATEMENT OF DELIVERY REQUIREMENTS:

(a) The required delivery date (month/year) is: 01/14

(b) Ship To:

SW3113 7

13. REFERENCE TO THE APPROVED ACQUISITION PLAN: An Acquisition Plan is not required for this acquisition.
