AMSC B. This part must be acquired from a manufacturing source(s) specified on a source control or selected item drawing as defined by the current version of DoD-STD-100. Suitable technical data, Government data rights, or manufacturing knowledge are not available to permit acquisition from other sources, nor qualification testing of another part, nor use of a second source part in the intended application. Worldwide Aeronautical (8U755) is the only approved source for this item, and no other sources have expressed *interest* in this item. The approval process involves inspection and review of manufacturing techniques, special skills, qualifications, and knowledge required to complete the complex procedures. Additionally, this item is a Critical Application Item (CAI) and as such requires engineering source approval from the design control activity due to the existing unique design capability, engineering skills, and manufacturing knowledge required to acquire this item from other than the approved source. The cognizant Government engineering activity, NAVAIR is responsible for this process.
