Specific characteristics of the material or service that limit the availability to a sole source (unique features; function of the item; unique capabilities; facilities or special equipment; etc.). Describe in detail **why** only this suggested source can furnish the requirements to the exclusion of other sources. The EADS North America Test and Services Equipment [REDACTED]

[REDACTED]

[REDACTED] in accordance with 10 U.S.C. § 2464, with organic repair capability to be maintained at NSWC Crane Division. The subject supplies and services are required to support NSWC Crane in its role as the [REDACTED]

[REDACTED]

In order for NSWC Crane Division to support the [REDACTED] well as the build of an additional [REDACTED] test capacity, the same hardware/software currently utilized in the existing [REDACTED] and [REDACTED] need to be procured as the configuration of these [REDACTED]. Additionally, the same hardware/software is also needed to obtain adequate sparing for sustainment of the [REDACTED]

Procuring hardware/software that is different from the configuration of the existing [REDACTED] would result in as much as [REDACTED] in duplication of costs to the Government. These costs are associated with software and/or hardware redevelopment and establishing [REDACTED]. Furthermore, the procurement of different hardware/software would also result in the Government not being able to support the anticipated [REDACTED] means to conduct software and/or hardware redevelopment and establishment of new calibration requirements.

Thus, the procurement of the EADS North America Test and Services Equipment is necessary to maintain the current configuration [REDACTED] without contributing to the duplication of costs and schedule delays cited above.

For non-personal services indicate the highly technical or specialized expertise required. Describe the contractor's workforce, methods, materials or unique management or operating systems. If it is unique because of knowledge of key individuals, what is the basis of the knowledge that another firm could not obtain the same or equivalent expertise? Could another firm obtain the necessary highly specialized experience or technical capability in time to perform the requirement? No services are being obtained.

The required product(s) or service(s) represent(s) the minimum requirements of the Government and no other product(s) or service(s) can satisfy the need.

FILL IN ALL APPLICABLE BLANKS BELOW

The product(s) must be compatible in all aspects (form, fit, and function) with existing systems presently installed. Describe the equipment you have **now** and **how** the new item/service must coordinate, connect, or interface with the existing system. See above justification.

Patent rights, copyrights, trade secrets, technical data, secret processes, or other propriety data essential for contract performance limits competition. The proprietary data is:
