This is a new spiral upgrade program, that must be compatible with the current [REDACTED] upgrades. These cables are currently in use in the [REDACTED]. In order to use another vendor's solution, extensive research, engineering, testing, acceptance, installation procedures, documentation, and configuration would have to be modified.

For non-personal services indicate the highly technical or specialized expertise required. Describe the contractor's workforce, methods, materials or unique management or operating systems. If it is unique because of knowledge of key individuals, what is the basis of the knowledge that another firm could not obtain the same or equivalent expertise? Could another firm obtain the necessary highly specialized experience or technical capability in time to perform the requirement? The cables needed for this requirement are associated with QPL's M85045 and M24640 and therefore the Government cannot seek competition outside the OEM's listed. It is the Government's intent to open the requirement to the OEM's listed for each part number and their authorized distributors.

The required product(s) or service(s) represent(s) the minimum requirements of the Government and no other product(s) or service(s) can satisfy the need.
