SOLE SOURCE JUSTIFICATION FOR SIMPLIFIED ACQUISITIONS

1. The service listed on M94700-16-RC-00102 is available from only one source and competition is precluded for reasons indicated below. There are no substitutes available.

2. This acquisition is restricted to the following source:

Manufacturer: Fluke Electronics Corp.

Manufacturer POC and Phone Number: Patrick Butler (800)903-5853

Manufacturer Address: P.O. Box 9090 Everett, WA 98206-9090

3. Description of the service required, the estimated cost, and required delivery date.

Fluke MET/TEAM Software License, Portal, UPGXP Software Upgrade, Start-up and Training. MET/TEAM is a database for managing calibration and repairs of electronic signal and other measurement standards.

Estimated Cost: \$139,121.00

Requested Delivery: Best practicable

4. Specific characteristics of the service that limit the availability to a sole source e.g., unique features, function of the item, etc. Describe in detail why only this suggested source can furnish the requirements to the exclusion of other sources.

The Marine Corps Systems Command Test, Measurement, and Diagnostic Equipment (TMDE) Program Management has designated the MET/TEAM software program as the standard asset management system for all Marine Corps TMDE calibration labs. Marine Corps Logistics Command's TMDE depot level facility is required to make this transition. The Fluke MET/TEAM program has been evaluated by the US Navy and has been assigned DON Application and Database Management System (DADMS) number 93766. DADMS is the authoritative source for Department of the Navy Information Technology (IT) applications. Per OPNAV N6122, if an application or system is not registered in DADMS, it is not considered an official Navy application or system and therefore is not authorized for use.

5. Check and fill in all that are applicable:

The required calibration management software license must be compatible in all aspects (form, fit, and function) with existing systems presently installed. Describe the equipment you have now and how the new item/service must coordinate, connect, or interface with the existing system:

See paragraph 4 above.

Source Selection Information – See FAR 2.101 and 3.104

A patent, copyright, or proprietary data limits competition. The proprietary data are described as follows:

Fluke MET/TEAM Software

These are "direct replacement" parts/components for existing equipment.

Other information to support a sole-source buy:

CERTIFICATION

I certify that statements checked and information provided above are complete and correct to the best of my knowledge. I understand that the processing of this Sole-Source Justification precludes the use of full and open competition.
