

STATEMENT OF WORK FOR The Society of Asian Scientist and Engineers Proposal

I. INTRODUCTION

In support of the Chief of Naval Operations Recruiting Policy, Navy Recruiting Command Diversity personnel will participate in the Society of Asian Scientist and Engineers (SASE) National Conference and Career Fair during October 8-10, 2015. Our intent is to expand the scope of our involvement, cementing a commitment to this organization and increasing Asian American representation within our Navy; and strengthening our relationship with the organizations leadership.

SASE mission is to prepare Asian heritage scientists and engineers for success in the global business world, celebrate diversity on campuses and in the workplace, and to provide opportunities for members to make contributions to their local communities.

II. OBJECTIVE

In an ongoing effort to identify, and leverage talent from all qualified citizens, Navy continues to develop a relationship with SASE. Navy and SASE have independently identified the interrelationship between diversity, excellence in science and technology, our national capability and global competitiveness. Diversity is a key element that must be sustained and not episodic. Asian American Student recruiting, STEM, Center of Influence and Outreach require a Navy-wide approach. Educating the American public about the capability, importance and value of today's Navy is an essential responsibility of Navy Recruiting Command. The purpose of package is to participate in the 5th National Conference and Career Fair.
