Specific characteristics of the material or service that limit the availability to a sole source / brand name (unique features, function of the item, etc.). Describe in detail why only this suggested source / brand name can furnish the requirements to the exclusion of other sources / brands:

Naval Support Activity Bahrain Port Operations provides operational support to visiting and forward deployed U.S and Coalition ships and is home to the busiest OCONUS U.S Navy port. Currently the command utilizes a type of ship manufactured by Metal Shark Boats as patrol vessels. At present, six of the commands 27ft patrol ships are due for a midlife overhaul. Failure to have these boats operational will result in the command not being able to continue their mission, placing all units located at NSA Bahrain at risk of not having a secure port. The cost and lead time of purchasing six new boats would cost in the millions, placing an undue cost and risk on the Government.

CHECK & FILL IN ALL APPLICABLE BLANKS BELOW

The requested material or service represents the minimum requirements of the government.

The material/service must be compatible in all aspects (form, fit and function) with existing systems presently installed/performing. Describe the equipment/function you have now and how the new item/service must coordinate, connect, or interface with the existing system.

See above.

A patent, copyright or proprietary data limits competition. The proprietary data is the same as the parts listed above.

These are “direct replacements” parts/components for existing equipment.

Other information to support a sole source / name brand buy: **At this time Metal Shark Boats is the only approved distributor of the proprietary parts.**
