1. Description of the item or service required, the estimated cost, and required delivery date.

The LNL-3300 Intelligent System Controller (ISC) is designed for advanced access control applications and can be use as the access control engine for Lenel Security Systems. The estimated cost is \$1,320.56. The ISC needs to be available prior to and upcoming system upgrade that will be performed by an authorized Lenel dealer.

2. Specific characteristics of the material or service that limit the availability to a brand name mandatory requirement (unique features, function of the item, etc.). Describe in detail why only this suggested brand name can furnish the requirements to the exclusion of other brand names.

A Lenel Security System was installed in the building after SPAWAR competed and awarded a contract for a new security system. Changing the system is not feasible. The system is required for our current security certification and must be maintain by authorized Lenel dealers who will only use components proven to operate properly with the system. Only a Lenel ISC can be expected to function as a control engine in a Lenel Security System. Only a Lenel ISC is specifically designed, tested and supported to operate with the system.

3. CHECK & FILL IN ALL APPLICABLE BLANKS BELOW

The material/service must be compatible in all aspects (form, fit and function) with existing systems presently installed/performing. Describe the equipment/function you have now and how the new item/service must coordinate, connect, or interface with the existing system.

The current ISC is a LNL-1000. The LNL-3300 will allow us to fully utilize the capabilities of the latest security software and enable it to operate more efficiently when we expand the system in the near future, which we plan to do.

A patent, copyright or proprietary data limits competition. The proprietary data is

These are "direct replacements" parts/components for existing equipment.
