Proquest Congressional Research Digital Collection Prospective Subscription Web Service  
Proquest Advanced Technology and Aerospace Collection  
Proquest Natural Science Collection  
Proquest Worldwide Political Science Abstracts  
Proquest History Vault: World War II continuing service fee  
Newspaper Archive Academic Library Edition entire collection subscription  
Proquest History Vault: Vietnam War continuing service fee

X Specific characteristics of the material or service that limit the availability to a sole source / brand name (unique features, function of the item, etc.). Describe in detail why only this suggested source / brand name can furnish the requirements to the exclusion of other sources / brands.

Currently the United States Naval Academy (USNA) utilizes the databases listed above at provided by Proquest. Although the databases are provided by a few other companies Proquest is the only company who provides "Deep indexing". Deep indexing categorizes data, variables and other content represented in tables, maps, photographs and other figures. It allows users to search and retrieve information from these resources typically embedded in scholarly publications. Applicable journal article records are enhanced with thumbnails showing the tables and figures contained with that article.

These supplemental Deep Indexing databases will be searched along with the traditional Abstract & Index files so that users retrieve a more robust, relevant results set. Deep Indexing captures and categorizes data, variables and other content represented in tables, maps, photographs and other figures which are typically embedded in scholarly publications and previously undiscoverable when searching publications -- with ProQuest's Deep Indexing technology

assigning an average of 8 index terms per image. Applicable journal article records are further enhanced with thumbnails showing the objects contained within that article indicating a Deep Indexing result and giving a quick preview of the image(s).

These databases provide citations, abstracts, and indexing of the specialized literature in the subject areas subscribed to. In addition to the in depth content found in these databases, the interface is designed for the academic researcher, allowing for discovery of articles via a variety of methods including Keyword, ISSN, Journal Title, Publication Year, Author, Title, Descriptor (a subject descriptor is manually assigned to each article, which allows for very focused searching by researchers), Language, Publication Type, Country of Publication, or any combination of these.

These types of specialized databases are not freely available on the Internet. They are required to support the mission and curricular requirements of the United States Naval Academy.

CHECK & FILL IN ALL APPLICABLE BLANKS BELOW

The requested material or service represents the minimum requirements of the government.

We have subscribed to this online database for many years and it meets the requirements of the USNA library. There is no other electronic product that provides this information.

The material/service must be compatible in all aspects (form, fit and function) with existing systems presently installed/performing. Describe the equipment/function you have now and how the new item/service must coordinate, connect, or interface with the existing system.

A patent, copyright or proprietary data limits competition. The proprietary data is owned \_\_\_\_\_

These are "direct replacements" parts/components for existing equipment.

Other information to support a sole source / name brand buy:

I CERTIFY THAT STATEMENTS CHECKED, AND INFORMATION PROVIDED ABOVE, ARE COMPLETE AND CORRECT TO THE BEST OF MY KNOWLEDGE. I UNDERSTAND THAT THE PROCESSING OF THIS SOLE SOURCE / BRAND NAME JUSTIFICATION PRECLUDES THE USE OF FULL AND OPEN COMPETITION.
