Installation Services for the APC by Schneider Electric Symmetra PX UPS

March 9, 2018

1. Does the site have a traditional loading dock that can accommodate a tractor trailer?

   **ANSWER:** Tractor Trailers longer than 30 feet have a difficult time navigating the access roads to our supply warehouse.

2. Do you require inside delivery to the final location where the items will be installed, or just require drop off at the loading dock?

   **ANSWER:** The government requires a drop-off at our supply warehouse, building 59.

3. If you require inside delivery, will there be access to a freight elevator and enough room to accommodate a power jack for pallets, or will items have to be transported by hand to the final destination at the building?

   **ANSWER:** A Qualified forklift operator will transport cargo from the supply warehouse to the final destination. The Government will provide the forklift operator.
