QUESTIONS AND ANSWERS
N00244-18-Q-0077
Installation Services for the APC by Schneider Electric Symmetra PX UPS

March 9, 2018
UPDATE: March 12, 2018

1. Does the site have a traditional loading dock that can accommodate a tractor trailer?

**ANSWER:** Tractor Trailers longer than 30 feet have a difficult time navigating the access roads to our supply warehouse.

2. Do you require inside delivery to the final location where the items will be installed, or just require drop off at the loading dock?

**ANSWER:** The government requires a drop-off at our supply warehouse, building 59.

3. If you require inside delivery, will there be access to a freight elevator and enough room to accommodate a power jack for pallets, or will items have to be transported by hand to the final destination at the building?

**ANSWER:** A Qualified forklift operator will transport cargo from the supply warehouse to the final destination. The Government will provide the forklift operator.

*********************************************************************************************************************************************

4. Does this project have Union requirements?

**ANSWER:** Installation services are incidental to supply purchase. It is the responsibility of a contractor to be in compliance with applicable labor laws.

5. Does this job have an estimated project value?

**ANSWER:** The Independent Government Estimate is information for Official Use Only. This information is procurement sensitive and is prohibited from public disclosure.

6. Please clarify this is for Install only? Has the APC UPS already been purchased, or should the APC 40kVa Symmetra unit be included the as part of the bid?

**ANSWER:** The requirement is for Purchase, Installation, and Start-Up of the Symmetra PX UPS and should be quoted as such.
