STATEMENT OF WORK

Installation Services for the APC by Schneider Electric Symmetra PX UPS.

1. APC scheduled Assembly Service consists of installing 4 power module trays (16 power modules) and 4 battery module trays (16 batteries), in the Symmetra PX Frame. Assembly includes installing Seismic anchors to ensure UPS stability during seismic movements.
2. Contractor will provide required materials to assemble/install UPS.
3. Contractor must be an authorized service provider of Schneider Electric.
4. Labor includes:
   - Seismically anchor APC 40 KW PX UPS to floor or wall to prevent seismic damage.
   - Place and Hang wall mounted Maintenance Bypass Panel (MBP)
   - All wiring to be done to NEC, State, Local codes and manufacturers specifications.
   - Installation of equipment to occur during normal business hours, Monday – Friday, 7:00am – 2:00pm.
   - Installation scheduling may not coincide with the declared Promise Ship Date (PSD) of hardware
   - Equipment installed on ground floor or elevated for weight capacity of equipment, and standard dock access.
   - Adequate space is available to complete the work required
   - All services performed by Schneider Electric will be governed exclusively by Schneider Electric standard terms and conditions
   - Labor and materials covered by a one-year warranty. All equipment is subject to original manufacturer’s warranty
   - START-UP of the UPS must be done by an APC by Schneider Electric authorized agent to avoid warranty nullification.

5. Location of the UPS installation:
   - Tactical Training Group Pacific
     53720 Horizon Drive, Bldg 24B
     Room 110B
     San Diego, CA 92147
