

Solicitation Number: N00604-15-T-3052

Amendment Number: 0001

This amendment is issued to answer questions regarding the solicitation.

All other terms and conditions within will remain the same.

Clarification #1:

There will be no issues working on the port even if there is a military vessel in the proximity of the civilian crew working under this contract.

Clarification #2:

The weight of the counterweight and the chains is 13.5 tons which will be lifted separately. The empty fender body is 5.5 tons. We never lift a fender with water. We just tilt it and push the water out using air pressure, then lift the empty fender.

In accordance with the PWS paragraph 6.1, "The service provider shall be experienced in the handling of 4.5m X 9.0m Yokohama Submarine Hydro pneumatic Fenders."
