- All Work to be in accordance with OSHA and Army Corp of Engineers Safety Manual, EM-385-1-1 Current Edition Safety requirements.
- All Work to be in accordance with Safety and Health Standards for Construction Industry (29 CFR PART 1929 2007).

2.1 DESCRIPTION. Clean and fill cracks 1/8 to 1-3/4 in. wide. Cracks less than 1/8 in. wide do not need to be filled. Cracks more than 1-3/4 in. wide are not included in this work. See attachment 2 for photos of typical existing cracking patterns.

### **2.2 MATERIALS.**

Crack Filler: ASTM D 6690, Type 1 or 2. Ensure that all materials for crack filling are inspected and approved before incorporating them into the work. Each container of crack filler shall have a shelf life of at least six months. Material more than six months old shall be retested.

### **2.3 CONSTRUCTION.**

Contractor shall coordinate with the Contracting Officer prior to commencement of work to ensure all scheduling and access issues have been worked out properly. All questions shall be directed to the Contracting Officer.

**Crack Cleaning and Preparation.** Remove existing deteriorated filler using equipment capable of removing the material to  $\frac{3}{4}$  inch depth without damaging the sides of the pavement within the crack. Do not use equipment that creates a “V” shaped groove. Repair damage done to sound pavement resulting from construction operations.

Clean cracks by using high pressure water blasting, oil free air blowing, a heat lance, or a combination thereof. The Government may suspend operations when weather conditions might create a hazard to the traveling public.

Before filling, completely dry the cracks using a continuously moving heat lance. Do not use a direct flame and do not allow the lance to remain stationary over an area. Overheated pavement shall be removed to uncharred asphalt using a saw or router (vertical spindle type with diamond bit) and repaired as directed by the Government.

The Government will inspect the prepared cracks for debris, adherent dust, and dryness prior to filling. Repeat clean and dry operation to cracks as directed.

**Crack Filling.** Perform crack filling when the ambient and pavement surface temperatures are least 45 degrees F and rising, unless otherwise recommended by the manufacturer and approved by the Contracting Officer.

For cracks from  $\frac{1}{8}$  to 1 in. in width, heat the hot applied filler material as recommended by the manufacturer, in a double boiler, indirect heating kettle using oil as a heat transfer medium, or other approved equipment. The kettle shall have a mechanically operated agitator, recirculation pumps, and a positive thermostatic temperature control. Insulate the applicator wand and all connecting hoses. Do not overheat the filler or apply direct heating.

Withdraw and waste all filler that has been overheated, heated more than four hours, or that remains in the applicator at the end of the day's operation. Prior to the start of each day's operation, withdraw and waste at least 1 gallon of filler through the applicator wand.

Fill prepared and approved cracks until the material is  $\frac{1}{16}$  in. below or level with the pavement surface. If after two hours any filled crack is not in conformance with this requirement, refill the crack as directed.

If cracks cannot be filled due to filler drainage into a large void, repair the crack by plugging the void with HMA Superpave 4.75 mm or other approved material. Complete filling the crack as specified above. Remove excess filler from the surface of the pavement. If cracks are not filled on the same day they are prepared, reclean and dry them prior to filling. Do not allow traffic on the filled pavement until the crack filler has cured. Filler that pulls loose within 96 hours after opening the pavement to traffic shall be repaired at no additional cost to the Government.

2.4 The Contractor shall verify all on-site dimensions, conditions, methods and locations during pre-site visit and prior to installation.

2.5 The Contractor shall apply, monitor and remove (upon completion of work) proper lockout and tag out devices on all equipment undergoing repairs in accordance with the latest version of the U.S. Army Corps of Engineers Safety and Health Requirements Manual, EM-385-1-1.

2.6 The Contractor shall ensure that all trash and debris created by this project is cleaned up and removed off site.

2.7 All equipment and parts furnished and installed by the Contractor shall be warranted against defects and workmanship for a period of not less than one year from the date of acceptance at no additional cost to the Government during regular working hours. Manufacturer's warranty for all parts shall take effect upon the expiration date of the Contractor's one year warranty.

The AHA shall be continuously reviewed and, when appropriate, modified to address changing site conditions or operations. The analysis should be used during daily inspections to ensure the implementation and effectiveness of the activity's safety and

The Government performs background screening and credentialing. Throughout the year the Contractor employee must continue to meet background screening standards. Periodic background screenings are conducted to verify continued NCACS participation and installation access privileges. Under the NCACS program, no commercial vehicle inspection is required, other than for Random Anti-Terrorism Measures (RAM) or in the case of an

elevation of Force Protection Conditions (FPCON). Information on costs and requirements to participate and enroll in NCACS is available at <http://www.rapidgate.com/vendors/how-to-enroll> or by calling 1-877-727-4342. WELDERS - Receive rate prescribed for craft performing operation to which welding is incidental.

=====

Unlisted classifications needed for work not included within the scope of the classifications listed may be added after award only as provided in the labor standards contract clauses (29CFR 5.5 (a) (1) (ii)).

-----

The body of each wage determination lists the classification and wage rates that have been found to be prevailing for the cited type(s) of construction in the area covered by the wage determination. The classifications are listed in alphabetical order of "identifiers" that indicate whether the particular rate is a union rate (current union negotiated rate for local), a survey rate (weighted average rate) or a union average rate (weighted union average rate).

Union Rate Identifiers

A four letter classification abbreviation identifier enclosed in dotted lines beginning with characters other than "SU" or "UAVG" denotes that the union classification and rate were prevailing for that classification in the survey. Example: PLUM0198-005 07/01/2014. PLUM is an abbreviation identifier of the union which prevailed in the survey for this classification, which in this example would be Plumbers. 0198

indicates the local union number or district council number where applicable, i.e., Plumbers Local 0198. The next number, 005 in the example, is an internal number used in processing the wage determination. 07/01/2014 is the effective date of the most current negotiated rate, which in this example is July 1, 2014.

Union prevailing wage rates are updated to reflect all rate changes in the collective bargaining agreement (CBA) governing this classification and rate.

Survey Rate Identifiers

Classifications listed under the "SU" identifier indicate that no one rate prevailed for this classification in the survey and the published rate is derived by computing a weighted average rate based on all the rates reported in the survey for that classification. As this weighted average rate includes all rates reported in the survey, it may include both union and non-union rates. Example: SULA2012-007 5/13/2014. SU indicates the rates are survey rates based on a weighted average calculation of rates and are not majority rates. LA indicates the State of Louisiana. 2012 is the year of survey on which these classifications and rates are based. The next number, 007 in the example, is an internal number used in producing the wage determination. 5/13/2014 indicates the survey completion date for the classifications and rates under that identifier.

Survey wage rates are not updated and remain in effect until a new survey is conducted.

Union Average Rate Identifiers

Classification(s) listed under the UAVG identifier indicate that no single majority rate prevailed for those classifications; however, 100% of the data reported for the classifications was union data. EXAMPLE: UAVG-OH-0010 08/29/2014. UAVG indicates that the rate is a weighted union average rate. OH indicates the state. The next number, 0010 in the example, is an internal number used in producing the wage determination. 08/29/2014 indicates the survey completion date for the classifications and rates under that identifier.

A UAVG rate will be updated once a year, usually in January of each year, to reflect a weighted average of the current negotiated/CBA rate of the union locals from which the rate is based.

WAGE DETERMINATION APPEALS PROCESS

1.) Has there been an initial decision in the matter? This can be:

- \* an existing published wage determination
- \* a survey underlying a wage determination

- \* a Wage and Hour Division letter setting forth a position on a wage determination matter
- \* a conformance (additional classification and rate) ruling

On survey related matters, initial contact, including requests for summaries of surveys, should be with the Wage and Hour Regional Office for the area in which the survey was conducted because those Regional Offices have responsibility for the Davis-Bacon survey program. If the response from this initial contact is not satisfactory, then the process described in 2.) and 3.) should be followed.

With regard to any other matter not yet ripe for the formal process described here, initial contact should be with the Branch of Construction Wage Determinations. Write to:

Branch of Construction Wage Determinations  
 Wage and Hour Division  
 U.S. Department of Labor  
 200 Constitution Avenue, N.W.  
 Washington, DC 20210

2.) If the answer to the question in 1.) is yes, then an interested party (those affected by the action) can request review and reconsideration from the Wage and Hour Administrator (See 29 CFR Part 1.8 and 29 CFR Part 7). Write to:

Wage and Hour Administrator  
 U.S. Department of Labor  
 200 Constitution Avenue, N.W.  
 Washington, DC 20210

The request should be accompanied by a full statement of the interested party's position and by any information (wage payment data, project description, area practice material, etc.) that the requestor considers relevant to the issue.

3.) If the decision of the Administrator is not favorable, an interested party may appeal directly to the Administrative Review Board (formerly the Wage Appeals Board). Write to:

Administrative Review Board  
 U.S. Department of Labor  
 200 Constitution Avenue, N.W.  
 Washington, DC 20210

4.) All decisions by the Administrative Review Board are final.
