Re: **MDE No. 13-SF-0225**
No. N40080-11-D-0496
NSA Annapolis - WWTP Site Design for Denitrification Filter and Influent Pump Station
Modification # 1 – Due to funding, the upgrade to the WWTP will be broken into two phases.

Dear Mr. Klimoski:

The Water Management Administration (WMA) has reviewed the submittal received March 4, 2015 requesting modification of the approval dated August 5, 2013 for the above referenced project in Anne Arundel County. The review was in accordance with Sections 4-106 and 4-205 of the Department of the Environment Article, Annotated Code of Maryland with regard to Sediment Control and Stormwater Management. The following comments are a result of the review:

As a result of the review it has been determined that the following is **approved**:

Phase 1 - The replacement of a transformer/substation, installation of surge basin tank, and construction of micro-bioretenion facility #2 designed to meet the IART will be broken out of the originally approved project and constructed as Phase 1. The remaining components of this project are expected to be submitted to MDE for review as a later Phase 2 modification. Due to excess impervious area treatment by Phase 1, a credit of 0.03 ac has been applied to the Naval Academy Water Quality Bank. It is expected that this credit will be used for Phase 2.

It is the responsibility of the Applicant to insure that a copy of the approved modification shall be available at the construction site during the construction period. By copy of this letter, the approved modification will be transmitted to the Maryland Department of the Environment Inspection and Compliance Program. Please call Solomon Adamu at 410-537-4141 or me at (410) 537-3563 with any questions or comments.

Sincerely,

Amanda P. Malcolm, P.E.
