

**Question**

**Answer**

Can GFI be provided before award?

No. The GFI is the Nevigo project folder, It is a proprietary format and can only be opened by someone who owns a licensed copy of the product and cannot be released to a contractor not on a active contract. information on Nevigo Articy Draft's script format and product info is freely available online. It utilizes the "FinalDraft" script format, which is an industry standard for dialogue script writing.

In requirement number T2 (Delivery of each of the 27 scenario scripts), it is stated that the Government would furnish the SAPR Course Outline and Training Objectives. Are the 27 scenarios defined in that GFI, or any other?

GFI (SAPR Course Outline and Training Objectives and Premises/Synopses for each script to be developed) will describe and define the scenarios to be developed. The length of the scenarios will vary between 3-9 minutes.

Do the models need to be posable or are these just for 14 base level models in the clothing?

The clothes models will be size tested on the appropriate GFI provided model (Mixamo Fuse MaleFitA 3D Model or Mixamo Fuse FemaleFitA 3D Model). You will not be animating or posing the Mixamo Fuse characters.

Do the models need to be animated?

You will not be animating the Mixamo Fuse characters. This contract is for development of the clothing models only.

Based on the curriculum, do the models need to be shown in poses that would reflect the 27 scenario scripts they are requesting.

The clothing models will not be used at all for the script development or delivery.

Some of the design requirements are single items (e.g. shoes or hat). Does the requirement call for a full scale model with generic clothing on the rest of the body, nude, or just a partial model concentrating on the item requirement?

Each individual piece of clothing will be tested on the Mixamo Fuse Character models for sizing. Yes some clothing items will be compiled together into outfits. The Female civilian outfit and Male civilian outfit (NCIS) should be built and tested together on the Mixamo Fuse characters. The items for the Marine Utility outfit and service "C" uniform should also work together. The Government will do all final acceptance testing of the 3D outfits/uniforms using the commercially available Mixamo Fuse product and test against the MaleFitA and FemaleFitA models (as appropriate).

On 4a: Are you looking for the EGA design or EGA seal? Where on the heel should it be placed? Should this be in color, or is it a raised stamp in the material?

The Eagle Globe and Anchor symbol should shall adhere to the Marine Corps uniform regulations. a. <http://www.hqmc.marines.mil/Agencies/MarineCorpsUniformBoard.aspx> b. <http://www.marines.mil/Portals/59/Publications/MCO%20P1020.34G%20W%20CH%201-5.pdf>
