The LogMeIn program provides software and/or services to allow remote control, printing and file transfer to remote Windows computers, Macintosh computers, Blackberry smartphones, Android smartphones and Windows smartphones without the requirement of preinstalled software in the remote machine, nor domain membership. Competing products (Citrix GoToMeeting, LANdesk, Bomgar) either didn't cover all the devices required to support at the Naval Postgraduate School, or required locally installed software or domain membership.

3. Indicate if the requested material or service represents the minimum requirements of the Government.

This product meets the minimum requirements of the Government and has been in use for the past three years.

4. Indicate if the material or service must be compatible in all aspects (form, fit, and function) with existing systems presently installed/performing. Describe the equipment/function you have now and how the new item/service must coordinate, connect or interface with the existing system.

This software is currently being utilized by the Technology Assistance Center and all its staff is trained on how to use. The software meets all minimal requirements needed to support the local and distance learning venues.

*** If additional space is required, please attach a continuation sheet.

7. Provide any additional information to support a sole source/brand name sole source procurement. The rationale must justify "either" substantial duplication of cost to the Government that is not recovered through competition or unacceptable delays in fulfilling the mission of the agency.

Competing products (Citrix GoToMeeting, LANdesk, Bomgar) either didn't cover all the devices required to support, or required locally installed software or domain membership.

*** If additional space is required, please attach a continuation sheet.
