

Re: Pre-Bid Site Visit. 7-28-2015

Q1.) Item 13.C of RFQ references the front wall of offices to get new dry-wall and finish. Only other side walls addressed are where the pass thru door at 306 is to be removed and filled in.

Q2.) Items 13.F & 13.G as well reference only the front wall of the offices.

Please clarify the extent of new drywall and finishes to be provided. All walls of offices or just the front walls? Will all existing surface mounted electrical/ communication boxes stay exposed?

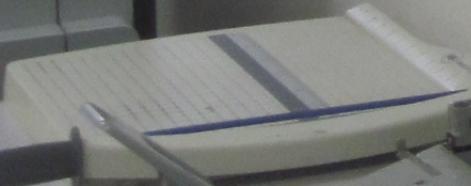

A: Please refer to the attached pictures two of the area in question and two showing what is expected when the job is completed.. The walls when finished will have the clean look like the office in pictures 1792/93. Windows will be framed and trimmed out. If required please make additional site visit to eliminate any further questions and or concerns. HLS
