5. Navy Commercial Access Control System (NCACS) Project

Commander, Navy Installations Command (CNIC), has established the Navy Commercial Access Control System (NCACS), a standardized process for granting unescorted access privileges to vendors, contractors, and suppliers not otherwise entitled to the issuance of a Common Access Card (CAC) who seek access to and can provide justification to enter Navy installations and facilities. Visiting vendors may obtain daily passes directly from the individual Navy installation by submitting identification credentials for verification and undergoing a criminal screening/background check. Alternatively, if the vendor chooses, it may voluntarily elect to obtain long-term credentials through enrollment, registration, background vetting, screening, issuance of credentials, and electronic validation of credentials at its own cost through a designated independent contractor NCACS service provider. Credentials will be issued every five years and access privileges will be reviewed/renewed on an annual basis. The costs incurred to obtain Navy installation access of any kind are not reimbursable, and the price(s) paid for obtaining long-term NCACS credentials will not be approved as a direct cost of this contract. Further information regarding NCACS can be found at http://cnic.navy.mil/CNIC_HQ_Site/ (under "Popular Links") or <http://rapidgate.com>

All deliveries to CNRNW commands must pass through the base Truck Inspection Station. All delivery vehicles are subject to inspection. Drivers should expect delays due to heightened security.

For access to the main, perimeter gates at any Navy Base Kitsap installation, contractors are required to be a US Citizen and have either:

2.1.1 Steel Panelized Reusable Buildings shall be the product of a building. The term pre-framed panels as used herein means factory fabricated units of exterior metal sheeting, structural frame and rigid insulation. Panels are to be designed for simple field assembly. Installation of exterior sheeting, structure and insulation with self-tapping screws at the building site is not acceptable. The Purchaser reserves the right to request the name(s) and addresses of at least five customers of these steel structured panel reusable buildings.

2.1.2 The minimum building inside dimensions are included under the heading Scope. The standard used by the manufacturer shall be equal to or greater than those indicated by the amount of the closest standard size thereto.

2.1.3 Completed building shall meet specified design requirements. The building shall be furnished unassembled and shall include the necessary pre-framed structured panel components, expansion anchors, and other materials specified herein.

2.1.4 Roof slope shall be 4 inches in 12 inches minimum.

2.1.5 Buildings shall be designed to be lifted using PSNS & IMF approved padeyes, after assembly.

2.1.6 Buildings shall be designed so as to allow assembly, dismantling, repacking, reshipping, and reassembling at other locations after the original installation with a crew with no prior experience with system.

2.2 DESIGN CRITERIA

2.2.1 Loadings: The steel panelized buildings described herein shall be designed for the dead load and the live loads specified under Scope, paragraph 1, as well as, the combination of these loads as set forth in the International Building Code (~~IBC~~).

For line items covered by the WTO GPA, the Government will evaluate offers of U.S.-made or designated country end products without regard to the restrictions of the Buy American statute. The Government will consider for award only offers of U.S.-made or designated country end products unless the Contracting Officer determines that there are no offers for such products or that the offers for such products are insufficient to fulfill the requirements of the solicitation.

(h) Certification Regarding Responsibility Matters (Executive Order 12689). (Applies only if the contract value is expected to exceed the simplified acquisition threshold.) The offeror certifies, to the best of its knowledge and belief, that the offeror and/or any of its principals—

(1) (___) Are, (___) are not presently debarred, suspended, proposed for debarment, or declared ineligible for the award of contracts by any Federal agency; and

(2) (___) Have, (___) have not, within a three-year period preceding this offer, been convicted of or had a civil judgment rendered against them for: Commission of fraud or a criminal offense in connection with obtaining, attempting to obtain, or performing a Federal, state or local government contract or subcontract; violation of Federal or state antitrust statutes relating to the submission of offers; or Commission of embezzlement, theft, forgery, bribery, falsification or destruction of records, making false statements, tax evasion, violating Federal criminal tax laws, or receiving stolen property; and

(3) (___) Are, (___) are not presently indicted for, or otherwise criminally or civilly charged by a Government entity with, commission of any of these offenses enumerated in paragraph (h)(2) of this clause; and

(4) [___] Have, [___] have not, within a three-year period preceding this offer, been notified of any delinquent Federal taxes in an amount that exceeds \$3,000 for which the liability remains unsatisfied.

(i) Taxes are considered delinquent if both of the following criteria apply:

(A) The tax liability is finally determined. The liability is finally determined if it has been assessed. A liability is not finally determined if there is a pending administrative or judicial challenge. In the case of a judicial challenge to the liability, the liability is not finally determined until all judicial appeal rights have been exhausted.

(B) The taxpayer is delinquent in making payment. A taxpayer is delinquent if the taxpayer has failed to pay the tax liability when full payment was due and required. A taxpayer is not delinquent in cases where enforced collection action is precluded.

(ii) Examples.

(A) The taxpayer has received a statutory notice of deficiency, under I.R.C. Sec. 6212, which entitles the taxpayer to seek Tax Court review of a proposed tax deficiency. This is not a delinquent tax because it is not a final tax liability. Should the taxpayer seek Tax Court review, this will not be a final tax liability until the taxpayer has exercised all judicial appeal rights.

(B) The IRS has filed a notice of Federal tax lien with respect to an assessed tax liability, and the taxpayer has been issued a notice under I.R.C. Sec. 6320 entitling the taxpayer to request a hearing with the IRS Office of Appeals contesting the lien filing, and to further appeal to the Tax Court if the IRS determines to sustain the lien filing. In the course of the hearing, the taxpayer is entitled to contest the underlying tax liability because the taxpayer has had no prior opportunity to contest the liability. This is not a delinquent tax because it is not a final tax liability. Should the taxpayer seek tax court review, this will not be a final tax liability until the taxpayer has exercised all judicial appeal rights.

(C) The taxpayer has entered into an installment agreement pursuant to I.R.C. Sec. 6159. The taxpayer is making timely payments and is in full compliance with the agreement terms. The taxpayer is not delinquent because the taxpayer is not currently required to make full payment.

(D) The taxpayer has filed for bankruptcy protection. The taxpayer is not delinquent because enforced collection action is stayed under 11 U.S.C. 362 (the Bankruptcy Code).

(i) Certification Regarding Knowledge of Child Labor for Listed End Products (Executive Order 13126). (The Contracting Officer must list in paragraph (i)(1) any end products being acquired under this solicitation that are included in the List of Products Requiring Contractor Certification as to Forced or Indentured Child Labor, unless excluded at 22.1503(b).)

(iv) The compensation (wage and fringe benefits) plan for all service employees performing work under the contract is the same as that used for these employees and equivalent employees servicing commercial customers.

(3) If paragraph (k)(1) or (k)(2) of this clause applies—

(i) If the offeror does not certify to the conditions in paragraph (k)(1) or (k)(2) and the Contracting Officer did not attach a Service Contract Labor Standards wage determination to the solicitation, the offeror shall notify the Contracting Officer as soon as possible; and

(ii) The Contracting Officer may not make an award to the offeror if the offeror fails to execute the certification in paragraph (k)(1) or (k)(2) of this clause or to contact the Contracting Officer as required in paragraph (k)(3)(i) of this clause.

(l) Taxpayer Identification Number (TIN) (26 U.S.C. 6109, 31 U.S.C. 7701). (Not applicable if the offeror is required to provide this information to the SAM database to be eligible for award.)

USE OF PAST PERFORMANCE INFORMATION RETRIEVAL SYSTEM – STATISTICAL REPORTING (PPIRS-SR) IN PAST PERFORMANCE EVALUATION

(1) The offeror's past performance shall be evaluated in accordance with FAR 13.106-2 or 15.305(a)(2), as applicable. This procurement is subject to Past Performance Information Retrieval System – Statistical Reporting

(PPIRS-SR), authorized by the Department of Defense for use by participating activities during the acquisition of supplies and services.

(2) The purpose of the PPIRS-SR is to provide contracting personnel with quantifiable past performance information regarding delivery and quality, as collected from existing DoD reporting systems. PPIRS-SR uses the past performance data collected to classify each supplier's performance by Federal Supply Class(es) or Service Code(s).

(3) Quality: The method used in PPIRS-SR to classify the quality of a supplier's past performance is a comparison of quality records among all suppliers who have provided goods or services to the Federal Government which are categorized in the same Federal Supply Class or Service Class (FSC). Based on the comparison among suppliers in a specific FSC group, suppliers are classified by PPIRS-SR into a color rating that represents the supplier's overall quality performance for that specific Federal Supply Class or Service Class. The following is a summarization of the PPIRS-SR classification colors:

1. Dark Blue: Top 5% of suppliers in FSC group*
2. Purple: Next 10% of suppliers in FSC group*
3. Green: Next 70% of suppliers in FSC group*
4. Yellow: Next 10% of suppliers in FSC group*
5. Red: Bottom 5% of suppliers in FSC group*

* If all supplier performance ratings for an entire FSC group are equal, all suppliers in that group will be classified Green.

(4) Delivery: Supplier delivery past performance is classified in PPIRS-SR by the supplier's percentage of on time deliveries. On time deliveries are calculated using the number of line items delivered and a weighting factor which reflects the length of time a delivery was overdue.

(5) PPIRS-SR classifications are established monthly for each supplier and can be reviewed at <http://www.ppirs.gov/>. Suppliers are granted access to PPIRS-SR for their own classifications. Offerors are encouraged to review their own classifications as well as the PPIRS-SR reporting procedures and methodology detailed in the PPIRS-SR Procedures Manual and the PPIRS-SR User Guide available at <http://www.ppirs.gov/>. The method to challenge a rating is also found on the identified website.

(6) Suppliers with no history in PPIRS-SR will be considered to have a neutral PPIRS-SR rating.

SINGLE AWARD FOR ALL ITEMS

Due to the interrelationship of supplies and/or services to be provided hereunder, the Government reserves the right to make a single award to the offeror whose offer is considered in the best interest of the Government, price and other factors considered. ATTACHMENT ONE (1)

PERFORMANCE WORK STATEMENT FOR PSNS & IMF APPROVED LIFTING ATTACHMENTS FABRICATED BY OTHERS

Lifting attachments fabricated by vendor shall be incorporated into equipment provided by this contract and meet the following technical requirements:

1. The allowable bending strength shall be based on 1/3 of the yield stress or 1/5 of the ultimate, whichever is most conservative, of the lifting material.
2. The shear strength shall be based on the Von Mises stress factor of $(1/3)^{1/2}$ (or about 0.577) times the allowable design bending strength.
3. The bearing strength shall be based on 1/5 of 150% of the ultimate strength of the lifting attachment material based on Roark's Formulas for Stress and Strain.
4. The lifting attachments shall be sized for the design load plus 10% for unexpected growth in the weight of the load. The resulting value shall be further increased to reflect the loads induced by the angle the slings make to the plane the lifting attachments lie on. The attachments shall be oriented so that the slings shall not pull out of the plane of the individual lifting attachment by more than 5 degrees. All lifting attachment welds shall be free of cracks, crevices, craters and divots caused by start/stopping of welds. Welds shall be continuous and wrapped at corners. 6. The structure supporting the lifting attachments shall be designed to sustain the various lateral loads imparted by the arrangement of the lifting attachments and the induced sling loads.
7. The contractor will be required to subject the lifting attachments to a 200% load test for 10 minutes.

Acceptance criteria shall be, no bending, cracking, or permanent deformation of the lifting attachments or associated structure. The contractor shall label the lifting attachments with the working load limit (WLL) and the test date. Contractor will provide written load test certification at the time of delivery or prior to installation of lifting attachments.

8. The contractor will be required to provide calculations stamped by a professional engineer to verify the lifting attachments will meet or exceed the load test conditions and design criteria specified above. The certified calculations will be provided at the time of delivery.
9. The contractor will perform a magnetic particle test (MT) on all accessible surfaces of the lifting attachment material and accessible associated welds per NAVSEA T9074-AS-GIB-010/271 using the acceptance criteria of MIL-STD-2035A, Class 3 for welds and wrought material for base metal. This magnetic particle inspection is the "Weld and Base Metal Post- Load Test MT.
10. The contractor shall provide written documentation to PSNS & IMF that the magnetic particle test (MT) inspections and load test(s) have been satisfactorily performed. Ensure documentation clearly specifies performance of "PRE" and "POST" load MT's, method used (NAVSEA T9074-AS-GIB-010/271 required), acceptance criteria used (MIL-STD-2035 required), and items (pieces and welds) that were inspected
