3.3 Changes in Design, Material Servicing, or Part Number - Except for a Code 1 change, which shall be processed as provided in the code statement shown below, no substitution of items shall be made until the SPCC Contracting Officer has been notified and approval has been given by issuance of a written change order. When any change in design, material, servicing or part number is made to replace or substitute any item to be furnished on this contract/purchase order, the Contractor shall furnish, for the substituting/replacement item, a drawing and an explanation of the reason for the change, or a detailed description of the change, explaining the reason therefore. If finished detail drawings are not available, shop drawings in the form used by the manufacturer will be acceptable for Government evaluation. When notifying the Contracting Officer of the reasons for making substitutions, the type of change shall be indicated by code number in accordance with one of the following statements:

Code 1: PART NUMBER CHANGE/MINOR DESIGN CHANGE - If the Manufacturer's Part Number or item design indicated thereon has changed, but form, fit and function of the item is not affected thereby, and the design change meets the criteria for minor, by not effecting form, fit, function, reliability or safety , supply the item and advise SPCC immediately of the new part number, furnishing a detail drawing and/or a detailed description of the change, as applicable.

Code 5: Part redesigned - New part replaces old. Old part cannot replace new.

Code 6: Part redesigned - Parts not interchangeable.

3.4 Mercury Free - The material supplied under this contract/purchase order is intended for use on submarines/surface ships and therefore shall contain no metallic mercury and shall be free from mercury contamination. Mercury contamination of the material will be cause for rejection.

If the inclusion of metallic mercury is required as a functional part of the material furnished under this contract, the Contractor shall obtain written approval from the Procurement Contracting Officer before proceeding with manufacture. The contractor's request shall explain in detail the requirements for mercury, identify specifically the parts to contain mercury, and explain the method of protection against mercury escape. Such a

request will be forwarded directly to the Procurement Contracting Officer with a copy to the applicable Government Inspector. Upon approval by the Contracting Officer, the vendor will provide a "Warning Plate" stating that metallic mercury is a functional part of the item and will include name and location of that part.

The use of mercury, mercury compounds, or mercury-bearing instruments and/or equipment in a manner which might cause contamination in the manufacture, assembly, or test of material on this contract is prohibited. The most probable causes of contamination are direct-connected manometers, mercury vacuum pumps, mercury seals, or the handling of mercury in the immediate vicinity. Mercury switches, mercury in glass thermometers, standard cells and other items containing mercury may be used if they are located so as not to constitute a contamination hazard.

If external contamination by metallic mercury occurs or is suspected, the following test may be used to determine whether contamination by metallic mercury exists or whether corrective cleaning measures have been effective. Enclose the equipment in a polyethylene bag or close-fitting airtight container for eight hours at room temperature (70 degrees F minimum). Sample the trapped air and if mercury vapor concentration is 0.01 mg/cu meter or more, the material is mercury contaminated insofar as the requirements of this contract are concerned.

These requirements shall be included in any subcontract or purchase order hereunder and the Contractor shall insure SubContractor compliance with these requirements.

Technical questions pertaining to these requirements shall be referred to the Procurement Contracting Officer via the cognizant Administrative Contracting Officer. For background, the following information is provided:

Mercury is corrosive to gold, silver, nickel, stainless steels, aluminum and copper alloys. Stainless steels, nickel, and copper alloys are widely used in reactor plants and other submarine/surface ship systems. Accidental trapping of mercury in a component could cause serious damage to vital parts. Mercury is also toxic if inhaled, ingested, or absorbed through the skin. It is evident that grave consequences could result from small amounts of mercury vapor present in an unreplenished submarine/surface ship atmosphere.

(1) Only one offer was received; and

(2) Additional cost or pricing data is required in order to determine whether the price is fair and reasonable or to comply with the statutory requirement for certified cost or pricing data (10 U.S.C. 2306a and FAR 15.403-3).

(b) Requirement for submission of additional cost or pricing data. Except as provided in paragraph (c) of this provision, the Offeror shall submit additional cost or pricing data as follows:

(3) The Offeror grants the Contracting Officer or an authorized representative the right to examine, at any time before award, books, records, documents, or other directly pertinent records to verify any request for an exception under this provision, and the reasonableness of price. For items priced using catalog or market prices, or law or regulation, access does not extend to cost or profit information or other data relevant solely to the Offerors determination of these prices to be offered in the catalog or marketplace.

(4) Requirements for certified cost or pricing data. If the Offeror is not granted an exception from the requirement to submit certified cost or pricing data, the following applies:

(C) If a prime contractor and/or subcontractor is performing work for more than one executive agency, a separate report shall be submitted to each executive agency covering only that agency's contracts, provided at least one of that agency's contracts is over \$850,000 (over \$1.5 million for construction of a public facility) and contains a subcontracting plan. For DoD, a consolidated report shall be submitted for all contracts awarded by military departments/agencies and/or subcontracts awarded by DoD prime Contractors.

(D) The consolidated SSR shall be submitted annually for the twelve month period ending September 30. The report is due 30 days after the close of the reporting period.

( < > ) Alternate II (OCT 2001) applies when contracting by negotiation (subcontracting plans are required with initial proposals).

( < > ) Alternate III (Jul 2014) applies if a contract award/modification is issued, but a Contract Action Report (CAR) will NOT be entered into the Federal Procurement Data System (FPDS) because disclosure would compromise national security.

NAVSUPWSS NOTE 1: When entering either "Individual Subcontracting Reports" (ISR) or "Summary Subcontracting Reports" (SSR) in the Electronic Subcontracting Reporting System (eSRS), the contractor must enter the email address for the appropriate "Contracting Official". The NAVICP eSRS Contracting Official for this contract is ( <SCOTT.LESH@DLA.MIL> ).

NAVSUPWSS NOTE 2: If the contractor has an approved Commercial Subcontracting Plan, submission of "Individual Contracting Reports" (ICR) is not required. The authority to acknowledge or reject "Summary Subcontracting Reports" (SSR) for a Commercial Subcontracting Plan resides with the Contracting Officer who approved the commercial plan itself, not the Contracting Officer who signed the individual contract. The contractor must enter into eSRS the email address of the Contracting Officer who approved the Commercial Subcontracting Plan as the Contracting Official for all contracts covered by this plan, no matter which Government activity issued the contract.

To the maximum extent practicable, the Contractor shall identify and mark attributional/proprietary information. (m) Subcontracts. The Contractor shall-

(1) Include this clause, including this paragraph (m), in subcontracts, or similar contractual instruments, for operationally critical support, or for which subcontract performance will involve a covered contractor information system, including subcontracts for commercial items, without alteration, except to identify the parties; and

(2) When this clause is included in a subcontract, require subcontractors to rapidly report cyber incidents directly to DoD at <http://dibnet.dod.mil> and the prime Contractor. (a) The Contractor shall deliver <TBD> unit(s) of Lot/Item <0001> within <TBD> calendar days from the date of this contract to the Government at <TBD> {insert name and address of the testing facility} for first article tests. The shipping documentation shall contain this contract number and the Lot/Item identification. The characteristics that the first article must meet and the testing requirements are specified elsewhere in this contract.

(b) Within <TBD> calendar days after the Government receives the first article, the Contracting Officer shall notify the Contractor, in writing, of the conditional approval, approval, or disapproval of the first article. A notice of conditional approval shall state any further action required of the Contractor. A notice of disapproval shall cite reasons for the disapproval.

(c) If the first article is disapproved, the Contractor, upon Government request, shall submit an additional first article for testing. After each request, the Contractor shall make any necessary changes, modifications, or repairs to the first article or select another first article for testing. All costs related to these tests are to be borne by the Contractor, including any and all costs for additional tests following a disapproval. The Contractor shall furnish any additional first article to the Government under the terms and conditions and within the time specified by the Government. The Government shall act on this first article within the time limit specified in paragraph (b) of this clause. The Government reserves the right to require an equitable adjustment of the contract price for any extension of the delivery schedule or for any additional costs to the Government related to these tests.

(d) If the Contractor fails to deliver any first article on time, or the Contracting Officer disapproves any first article, the Contractor shall be deemed to have failed to make delivery within the meaning of the Default clause of this contract.

(e) Unless otherwise provided in the contract, the Contractor--

(2) Shall remove and dispose of any first article from the Government test facility at the Contractor's expense.

(f) If the Government does not act within the time specified in paragraph (b) or (c) of this clause, the Contracting Officer shall, upon timely written request from the Contractor, equitably adjust under the Changes clause of this contract the delivery or performance dates and/or the contract price, and any other contractual term affected by the delay.

(g) The Contractor is responsible for providing operating and maintenance instructions, spare parts support, and repair of the first article during any first article test.

(h) Before first article approval, the acquisition of materials or components for, or the commencement of production of, the balance of the contract quantity is at the sole risk of the Contractor. Before first article

(1) The Government may waive the requirement for first article approval test where supplies identical or similar to those called for in the schedule have been previously furnished by the Offeror/Contractor and have been accepted by the Government. The Offeror/Contractor may request a waiver.

< > Alternate I (Jan 1997). As prescribed in 9.308-2(a)(2) and (b)(2), add the following paragraph (j) to the basic clause:

## OFFEROR REPRESENTATIONS AND CERTIFICATIONS--COMMERCIAL ITEMS (APR 2016)

(111) The Government will evaluate offers in accordance with the policies and procedures of FAR Part 25. For line items covered by the WTO GPA, the Government will evaluate offers of U.S.-made or designated country end products without regard to the restrictions of the Buy American statute. The Government will consider for award only offers of U.S. made or designated country end products unless the Contracting Officer determines that there are no offers for such products or that the offers for such products are insufficient to fulfill the requirements of the solicitation.

(h) Certification Regarding Responsibility Matters (Executive Order 12689). (Applies only if the contract value is expected to exceed the simplified acquisition threshold.) The offeror certifies, to the best of its knowledge and belief, that the offeror and/or any of its principals--

(1)  Are,  are not presently debarred, suspended, proposed for debarment, or declared ineligible for the award of contracts by any Federal agency;

(2)  Have,  have not, within a three-year period preceding this offer, been convicted of or had a civil judgment rendered against them for: commission of fraud or a criminal offense in connection with obtaining, attempting to obtain, or performing a Federal, state or local government contract or subcontract; violation of Federal or state antitrust statutes relating to the submission of offers; or commission of embezzlement, theft, forgery, bribery, falsification or destruction of records, making false statements, tax evasion, violating Federal criminal tax laws, or receiving stolen property; and

(3)  Are,  are not presently indicted for, or otherwise criminally or civilly charged by a Government entity with, commission of any of these offenses enumerated in paragraph (h)(2) of this clause; and

(4)  Have,  Have not, within a three-year period preceding this offer, been notified of any delinquent Federal taxes in an amount that exceeds \$3,500 for which the liability remains unsatisfied.

(i) Taxes are considered delinquent if both of the following criteria apply:

(A) The tax liability is finally determined. The liability is finally determined if it has been assessed. A liability is not finally determined if there is a pending administrative or judicial challenge. In the case of a judicial challenge to the liability, the liability is not finally determined until all judicial appeal rights have been exhausted.

(B) The taxpayer is delinquent in making payment. A taxpayer is delinquent if the taxpayer has failed to pay the tax liability when full payment was due and required. A taxpayer is not delinquent in cases where enforced collection action is precluded.

(ii) Examples.

(A) The taxpayer has received a statutory notice of deficiency, under I.R.C. 6212, which entitles the taxpayer to seek Tax Court review of a proposed tax deficiency. This is not a delinquent tax because it is not a final tax liability. Should the taxpayer seek Tax Court review, this will not be a final tax liability until the taxpayer has exercised all judicial appeal rights.

(B) The IRS has filed a notice of Federal tax lien with respect to an assessed tax liability, and the taxpayer has been issued a notice under I.R.C. 6320 entitling the taxpayer to request a hearing with the IRS Office of Appeals contesting the lien filing, and to further appeal to the Tax Court if the IRS determines to sustain the lien filing. In the course of the hearing, the taxpayer is entitled to contest the underlying tax liability because the taxpayer has had no prior opportunity to contest the liability. This is not a delinquent tax because it is not a final tax liability. Should the taxpayer seek tax court review, this will not be a final tax liability until the taxpayer has exercised all judicial appeal rights.

(C) The taxpayer has entered into an installment agreement pursuant to I.R.C. 6159. The taxpayer is making timely payments and is in full compliance with the agreement terms. The taxpayer is not delinquent because the taxpayer is not currently required to make full payment.

(D) The taxpayer has filed for bankruptcy protection. The taxpayer is not delinquent because enforced collection action is stayed under 11 U.S.C. 362 (the Bankruptcy Code).

(i) Certification Regarding Knowledge of Child Labor for Listed End Products (Executive Order 13126). (The Contracting Officer must list in paragraph (i)(1) any end products being acquired under this solicitation that are included in the List of Products Requiring Contractor Certification as to Forced or Indentured Child Labor, unless excluded at.)

**ALTERNATIVE LINE ITEM STRUCTURE (SEP 2011)**

(a) Line items are the basic structural elements in a solicitation or contract that provide for the organization of contract requirements to facilitate pricing, delivery, inspection, acceptance and payment. Line items are organized into contract line items, subline items, and exhibit line items. Separate line items should be established to account for separate pricing, identification (see section 211.274 of the Defense Federal Acquisition Regulation Supplement), deliveries, or funding. The Government recognizes that the line item structure in this solicitation may not conform to every offeror's practices. Failure to correct these issues can result in difficulties in accounting for deliveries and processing payments. Therefore, offerors are invited to propose an alternative line item structure for items on which bids, proposals, or quotes are requested in this solicitation to ensure that the resulting contract structure is economically and administratively advantageous to the Government and the Contractor.

(b) If an alternative line item structure is proposed, the structure must be consistent with subpart 204.71 of the Defense Federal Acquisition Regulation Supplement and PGI 204.71 (DFARS/PGI view). A sample line item structure

**SECTION L - CONTINUED**

NAVSUPWSSLA01 - SUBMISSION OF PROPOSALS

**Step One -**

**Request for Technical Proposals:**

Offerors shall submit a technical proposal, excluding price, in accordance with the Purchase Description for Bridge, Resistance, which is attached (attachment 3) to this solicitation. Offeror's technical proposals shall be sufficiently detailed, specific, and complete as to enable Government personnel to make a thorough evaluation of the proposal and a sound determination that the offeror will have a reasonable likelihood of meeting the requirements and objectives of the Government. Offerors are not required, at this time, to submit a signed copy of the solicitation.

This Request for Technical Proposals is not binding on the Government and does not in any way commit the Government to pay for any costs incurred in the preparation and submission of the requested technical proposal.

Each offeror shall submit its technical proposal by the date specified on page 1 of 57 of the solicitation to:

Scott Lesh  
Contracting Specialist  
DLA Maritime at Mechanicsburg  
5450 Carlisle Pike, P.O. Box 2020, Bldg 410  
Mechanicsburg, PA 17055-0788

To maximize efficiency and minimize the proposal evaluation process, each offeror shall submit its technical proposal in accordance with the format provided below. Each offeror shall submit only one technical proposal in response to this solicitation, subject to the following requirements and limitations:

- Title Page: "Unpriced Technical Proposal" The title page of the technical proposal shall include: (1) the solicitation number (SPRMM116RYK89); (2) the company name and CAGE Code of the offeror; (3) the offeror shall identify those portions of its technical proposal that contain copyrighted or proprietary or similar proposal data; (4) date of submittal.

- The company name of the bidder shall appear only at the top of the first page and nowhere else in the proposal except in appendices. Each page of the proposal that contains company proprietary data shall so state.

**Oral or Written Discussions**

The Government intends to evaluate proposals and make acceptable/unacceptable determinations without discussions with offerors (except clarifications as described in FAR 15.306(a)). Therefore, the offeror's initial technical proposal should contain the offeror's best terms from a technical standpoint. The Government reserves the right to conduct discussions if the Contracting Officer later determines them to be necessary.

**Notice of Unacceptable Technical Proposals**

When a technical proposal is rated unacceptable either initially, or after clarification/discussions, the DLA Contracting Officer will notify the offeror of the basis of the determination and that a revision of the proposal will not be considered.

**Bid Sample Test (BST)**

BST units (quantity to be determined, HISTORICALLY 2 each) may be required for test purposes. Contractors will be notified by the PCO whether BST units are required or if BST has been waived by the Naval Research Lab (NRL). BST units shall be provided to NRL within 30 days after notification of acceptance of the submitted technical proposal. Correction to an offeror's BST units that may be required must be made within (# of days to be specified upon discovery of deficiency). Failure to correct deficiency within the time period specified may result in disqualification from further consideration.

**Step Two –**

**Request for Price Proposals:**

**I. General**

After receiving a notification of acceptable technical proposal and, if necessary, Bid Sample Test, offerors are required to submit a proposal as follows (electronic files acceptable):

**Price Proposal.** Submit the completed and signed solicitation document to include the completed Section B Pricing Spreadsheet found on page 2B of the solicitation. Offerors must respond to all requirements of the solicitation document. Offerors are cautioned not to alter or disassemble the solicitation.

## SECTION M – EVALUATION FACTORS FOR AWARD

### NAVSUPWSSMA02 – EVALUATION FOR AWARD (Lowest Price Technically Acceptable)

This is a two-step solicitation. The first step will be a request for technical proposals and, upon acceptance of the submitted technical proposal, the second step will be a request for price proposals.

The Government intends to make an award to the eligible, responsible, lowest priced technically acceptable offeror. A technically acceptable offer is one that complies with the requirements of the solicitation and does not take exception, nor object, to any of the terms of the solicitation. Offers that are not technically acceptable will not be considered for award. The offeror's proposal shall be in the form prescribed by, and shall contain a response to each of the areas identified in the Section L Solicitation Provision entitled "Submission of Proposals."

#### **Evaluation Criteria**

(1) **Technical Proposal**. The Naval Research Laboratory will perform the evaluation of technical proposals. Acceptability of each technical proposal will be based upon compliance with the requirements of the preceding notes concerning content of the technical proposal, and, at a minimum, information satisfying the elements in each paragraph of the Purchase Description, clearly demonstrating that the offeror understands the scope and nature of the RFP and Purchase Description requirements. Evaluation of technical proposals will be conducted on an acceptable/unacceptable basis.

(2) **Price**. Price will be evaluated using proposed step ladder pricing. Based on historical purchase quantities and expected future demand, the RFP will specify 4 stepladder quantity price points for each item with five yearly ordering periods. For evaluation purposes: one delivery order for a quantity at the midpoint of each quantity interval for each year will be considered.

See associated Pricing Evaluation Matrix attachment (attachment #2) for the price evaluation methodology.

4.1.1 Operating temperature: 0° C to +50° C

4.1.2 Non-operating temperature: -40° C to +71°C

4.2 Power source

4.2.1 Internal DC Power: MIL-PRF-28800F DC internal power source requirements are invoked. Internal batteries and a charger are required. Minimum operating time shall be at least 24 hours following a maximum recharge time of 8 hours. A charger that accepts 110/220  $\pm 10\%$  Volt @ 50/60 Hz single phase shall be provided for each unit. A battery life indicator shall be incorporated into the display.

4.2.2 Maximum power consumption: 10W

4.3 Battery Restrictions Per MIL-PRF-28800F, Lithium and Mercury batteries are prohibited without prior authorization. A request for approval for the use of Lithium and Mercury batteries shall be submitted with production lot delivery, after contract award. Approval shall apply only to the specific model proposed.

Exceptions: Per Naval Ordnance Safety and Security Activity (NOSSA), the use of Lithium primary (non-rechargeable) coin cell batteries meeting the following criteria is authorized for Naval personnel and on Naval activities, surface ships, submarines, and aircrafts:

- Commercially available coin cell batteries, unmodified, and used in the device recommended by the application manufacturer.
- Coin cell batteries shall only be used in single cell configurations.
- Coin cell batteries shall not be rated for more than 3 volts (maximum nominal output voltage).
- Coin cell batteries shall not be rated for more than 1 Ampere-Hour nameplate capacity.

The coin cell manufacturer and model identification/part number shall be provided at the time of submission of proposals.

4.4 Wireless Connectivity Any capability of the equipment to communicate wirelessly, including but not limited to Wi-Fi and Bluetooth, shall be disabled.

4.5 Calibration interval The calibration interval shall be 24 months minimum. At the end of this interval, a minimum of 85% of the equipment shall remain in tolerance.

4.6 Calibration Procedure The procedure, software, and special interfaces/adapters that are needed for the equipment calibration shall be provided.

4.7 Dimension Not to exceed 15.5 cm (6.0 in) H x 40 cm (14in) W x 29 cm (11") D.

4.8 Weight Not to exceed 20 kg (44 lbs).

4.9

**Technical Manual** The maintenance philosophy for this unit shall be level 3 (per MIL-PRF-28800F) and require maintenance to the component level of the unit. The technical manual shall conform to the level 3 maintenance philosophy. This level would be used for most equipment where maintenance and repair is an expected phase of equipment lifecycle. Board level maintenance and troubleshooting information is required. A Use and Installation manual (Operator's Manual) shall be provided separately. Maintenance and Servicing manual shall be provided to two levels of maintenance, unit operational verification level and the module level.

Information required for performance verification shall include:

- Instructions to verify equipment performance,
- List the equipment required for verification tests,
- Step-by-step instructions for test connections,
- Acceptable result criteria,
- Calibration information,
- Self-test routines.

Maintenance information shall include:

- Parts lists to the component level,
- Schematics and component layout drawings,
- Block and schematic diagrams.
- List of required test equipment and connection diagrams, and sequential instructions for disassembly, repair, replacement, and reassembly shall be provided.
- Board level maintenance and troubleshooting information,
- Component level maintenance and troubleshooting information,
- Step-by-step instructions for troubleshooting and fault isolation, Expected signal levels,
- Test data sheets will be included, and as required,
- The instructions will define localizing a defective circuit card and the defective component(s).

Parts lists shall include:

- Parts lists shall be shown on illustrations or a separate listing that includes an index or reference to other illustrations.
